Based on historical characters and events, *A Sweetness to the Soul* recounts the captivating story of young, spirited Oregon pioneer Jane Herbert who at the age of twelve faces a tragedy that begins a life-long search for forgiveness and love. In the years that follow, young Jane finds herself involved in an unusual and touching romance with a dreamer sixteen years her senior, struggles to make peace with an emotionally distant mother, and fights to build a family of her own. Filled with

heart-warming insight and glimpses of real-life pain, *A Sweetness to the Soul* paints a brilliant picture of love that conquers all obstacles and offers a powerful testimony to the miracle of God's healing power.

Dealing with a complicated watch used to be a rare job for the watch repairer, but with the popularity of the automatic, it is almost commonplace. Furthermore, the increased interest in calendar work, alarm watches, and chronographs will

undoubtedly bring more and more complicated work into the workshop. This book deals with complicated work essentially from the repairer's point of view. The action of each mechanism is briefly and clearly described because understanding this is essential to proper servicing, repair and testing for functioning. Dismantling and assembly instructions are given, as well as oiling charts and - most important - hints on fault-finding and their rectification. Another essential feature of the book is that it deals with all complicated work - from the relatively simple automatic to the triple-complicated watch with chronograph, calendar and repeater work, and the very complicated clock watch. Exceptional care has been taken in the preparation of diagrams, which

have been drawn from actual movements in various stages of assembly, so that the reader can actually work with the book illustrations beside the watch itself. As always with books by Donald de Carle, instructions are easy to follow and there is no reason why anyone well versed in ordinary work and able to use watchmakers' tools should not become a specialist in complicated watches and their repair.

Seventeen-year-old Tracy Miller met the love of her life . . . thirty years after her own death. Tracy was working at the House of Horrors at the Amazing Lands Theme Park when the fire broke out. Instead of running, she lost her life trying

to save eleven-year-old Mack. Now thirty years have passed, and suddenly everything changes with the arrival of two new ghosts: a little girl named Ashley and a cute seventeen-year-old boy named Josh. Josh would do anything for Tracy, but can he help her let go of the past and accept his love? *Ride of Your Life* is a bittersweet, romantic, YA ghost story that was inspired by a true event: the Great Adventure Haunted Castle fire, which killed eight teenagers in 1984. It is a fantasy novel about undying love, and it won third-place in Smart Writer's Write It Now (W.I.N.) contest in the YA category, which was judged by Alex Flinn, the author of *Beastly* and *Cloaked*. Hang on. Love can be as terrifying as a roller coaster, but it can also be the *Ride of Your Life*.

Taste for clocks and other mechanical curiosities of the West seems to have invaded the court of China at an early date ; already at the beginning of the fourteenth century a French ironsmith, Guillaume Boucher, probably a prisoner brought back from some Mongol raid into Hungary, had constructed for the first Yuan Emperor of China an elaborate clock with fountains ; and when, in 1599, the great Jesuit missionary Matteo Ricci arrived in Peking he secured Imperial

favour and an entry to the Court largely by a gift of clocks. It was, however, only at the end of the seventeenth century, in the reign of K'ang Hsi, that clocks in great numbers began to invade the Palace. This enlightened monarch, who was filled with an admiration, rare in his dynasty, for the arts and sciences of Europe, welcomed learned Jesuit mathematicians and philosophers to his Court, and formed a collection of scientific instruments and time-pieces of all descriptions. -- Introduction.

All in Good Time is the remarkable story of George Daniels (1926-2011), the master craftsman, who was born into poverty but raised himself to become the greatest watchmaker of the

twentieth century. Daniels stands alone in modern times as the inventor of the revolutionary co-axial escapement, the first substantial advance in portable mechanical timekeeping over the lever escapement, which has dominated ever since its invention in 1759. Daniels's love of mechanics embraced not only the minute, however - he was also a passionate collector and driver of historic motorcars. This revised and expanded edition of his autobiography also contains a new section that illustrates and discusses over thirty of the pocket and wrist-watches Daniels himself made over the years. Witness here the triumph of intelligence, ingenuity, matchless skill and singularity of purpose over the most unpromising of beginnings.
