Chi era veramente Rita Levi-Montalcini? Una visionaria dotata di ferrea volontà per affrontare il presente sognando il futuro, oppure una tessitrice di rapporti che per sbarazzarsi dei condizionamenti ambientali era disposta a trascurare chiunque si frapponesse tra lei e suoi obiettivi? Per capirla occorreranno forse decenni. Rita nacque in un periodo senza telefoni, televisione, aerei, computer, sanità pubblica, voto alle donne, pensione. Morì quando tutto quanto citato era stato raggiunto. Ma lei in 103 anni di vita conquistò il Premio Nobel per la Medicina, divenne senatrice a vita, incontrò papi, presidenti degli Stati Uniti e della Repubblica Italiana, re, regine, capi di governo di mezzo mondo. Una scienziata tenace, ma pure una donna, capace di tenerezze ripetute come raccontano molti episodi di questo libro.

MINUTES TO MIDNIGHT Eren has infiltrated Marley territory and dealt the empire a devastating blow. But the real goal of the mission was always to get Zeke back to Paradis Island in secrecy. Now that this Titan heir of royal blood is inside the Walls, the island's military government has its "earth-rumbling" weapon of mass destruction. But has this supposed deterrent actually started a countdown to total world war?

*Il viaggio antropologico di Carlo Levi* Museum Tusculanum Press Spanning the nineteenth and twentieth centuries, this fascinating history explores the lives and achievements of great women in science across the globe. Ten Women Who Changed Science and the World tells the stories of trailblazing women who made a historic impact on physics, biology, chemistry, astronomy, and

medicine. Included in this volume are famous figures, such as two-time Nobel Prize winner Marie Curie, as well as individuals whose names will be new to many, though their breakthroughs were no less remarkable. These women overcame significant obstacles, discrimination, and personal tragedies in their pursuit of scientific advancement. They persevered in their research, whether creating life-saving drugs or expanding our knowledge of the cosmos. By daring to ask 'How?' and 'Why?', each of these women made a positive impact on the world we live in today. In this book, you will learn about: Astronomy Henrietta Leavitt (United States, 1868-1921) discovered the period-luminosity relationship for Cepheid variable stars, which enabled us to measure the size of our galaxy and the universe. Physics Lise Meitner (Austria, 1878-1968) fled Nazi Germany in 1938, taking with her the experimental results which showed that she and Otto Hahn had split the nucleus and discovered nuclear fission. Chien-Shiung Wu (United States, 1912-1997) demonstrated that the widely accepted 'law of parity', which stated that left-spinning and right-spinning subatomic particles would behave identically, was wrong. Chemistry Marie Curie (France, 1867-1934) became the only person in history to have won Nobel prizes in two different fields of science. Dorothy Crowfoot Hodgkin (United Kingdom, 1910-1994) won the Nobel Prize for Chemistry in 1964 and pioneered the X-ray study of large molecules of biochemical importance. Medicine Virginia Apgar (United States, 1909-1974) invented the Apgar score, used to quickly assess the health of newborn babies. Gertrude Elion (United States, 1918-1999) won the Nobel Prize for Physiology or Medicine in 1988 for her advances in drug development. Biology Rita Levi-Montalcini (Italy, 1909-2012) won the Nobel Prize for Physiology or Medicine in 1986 for her co-discovery in 1954 of Nerve Growth Factor (NGF). Elsie Widdowson (United Kingdom, 1906-2000) pioneered the science of nutrition and helped devise the World War II food-rationing program. Rachel Carson (United States, 1907-1964) forged the environmental movement, most famously with her influential book Silent Spring.

Anno 2016: YTEM Yacht'n Italy Export Museum giunge al quarto episodio. In questa fase, ogni anno verrà individuata una figura di eccellenza che si sia professionalmente distinta nell'ambito della progettazione, del design, dell'innovazione, della cultura nautica che abbia dato un contributo al Made in Italy. In questa occasione YTEM, presenterà la "prima" di questa nuova fase alla 56<sup>a</sup> edizione del Salone Nautico di Genova. La scelta del personaggio di quest'anno coincide con l'iniziativa dell'Università degli Studi di Genova di riconoscere alla figura di Renato "Sonny" Levi la Laurea Magistrale honoris causa in Yacht Design. Progettista vivente di straordinaria longevità e produttività, con alle spalle oltre sessantacinque anni di progettazione in ambito nautico, Levi

ha vissuto attivamente tutto il periodo della nautica italiana, dal 1959 al presente, oggetto dello studio storico di inquadramento di YTEM. In parallelo negli spazi del padiglione B durante il 56° Salone Nautico Internazionale di Genova, la mostra "Renato 'Sonny' Levi Milestones of yacht design", organizzata dall'Università degli Studi di Genova, dalla fondazione Promostudi di La Spezia con il patrocinio del sito Altomareblu (www.altomareblu.com) e il supporto della Levi Boats e Ucina Confindustria Nautica. YTEM fin dal primo concepimento ha espresso, in una sorta di Mise en abyme, la sua volontà di essere non solo un contenitore per il design e la sua narrazione, ma esso stesso un prodotto del design Made in Italy.

**THE THIEF AND THE SOLDIER** The young Erwin Smith is a rising star in the Survey Corps, humanity's only hope of defeating the man-eating monsters known as Titans. Ruthless and dispassionate, Erwin's mind is devoted to strategies and intrigue. But beneath Erwin's feet is another world, the Underground, where humans are born and die surrounded by the garbage the Capital throws away. Here, the criminal Levi survives on his wits and agility. But when these two ambitious men cross paths, who will prove himself stronger? The long-awaited origin story of Levi and Erwin, two of Attack on Titan's most beloved characters!

**Carlo Levi e Umberto Saba** Meridiana Libri

In this post-apocalyptic sci-fi story, humanity has been devastated by the bizarre, giant humanoids known as the Titans. Little is known about where they came from or why they are bent on consuming mankind. Seemingly unintelligent, they have roamed the world for years, killing everyone they see. For the past century, what's left of the human race has hidden in a giant, three-walled city.

At great cost to the Garrison and the Survey Corps, Commander Erwin has managed to recover Eren from the Titans who tried to carry him off. But during the battle, Eren manifested yet another power he doesn't understand. As Eren and Krista find new enemies, the Survey Corps faces threats from both inside and outside the walls. And what will happen to Ymir, now that she has decided to make herself the Titans' prize?

*10 Women Who Changed Science and the World* EGEA spa Situated at the intersection of animal studies and literary theory, this book explores the remarkable and subtly pervasive web of animal imagery, metaphors, and concepts in the work of the Jewish-Italian writer, chemist, and Holocaust survivor Primo Levi (1919-1987). Relatively unexamined by scholars, the complex and extensive animal imagery Levi employed in his literary works offers new insights into the aesthetic and ethical function of testimony, as well as an original perspective on contemporary debates surrounding human-animal relationships and posthumanism. The three main sections that compose the book mirror Levi's approach to non-human animals and animality: from an unquestionable bio-ethical origin ("Suffering"); through an investigation of the relationships between writing, technology, and animality ("Techne"); to a creative intellectual project in which literary animals both counterbalance the inevitable suffering of all creatures, and suggest a transformative image of interspecific community ("Creation").

Russo Bullaro's collection focuses on Benigni's Oscar winning *La vita è bella/Life is Beautiful*, a film which has set off continuous and often bitter debate about Holocaust representation and historical consciousness. The topics covered in Russo Bullaro's collection offer insights from critics around the world in a forum for the consideration of the wider issues that Benigni's films provoke.

Eugenio Elia Levi è stato uno dei più grandi matematici italiani del '900 (come del resto il fratello Beppo). Morì nell'ottobre del 1917, ucciso da un cecchino, nelle fasi iniziali della disfatta di Caporetto. Attivo interventista, allo scoppio della prima guerra mondiale si era arruolato volontariamente nel Genio Zappatori e fu poi promosso capitano per meriti di guerra. Eugenio Elia Levi si era laureato in Matematica nel 1904, studiando alla "Normale" di Pisa dove ebbe come maestri Luigi Bianchi e Ulisse Dini. Nel 1909 ottenne la cattedra di Analisi infinitesimale presso l'Università di Genova. La sua produzione scientifica fu tanto profonda quanto differenziata - ha riguardato i gruppi di Lie, le equazioni alle derivate parziali e la teoria delle funzioni di più variabili complesse - e venne immediatamente apprezzata negli ambienti matematici internazionali.

Rileggere Carlo Levi a vent'anni dalla morte (1975) con la volontà di rimettersi a tu per tu con il testo, volutamente ignorando quanto - di valido, ma anche, e non di rado, di rievocativo e commemorativo o elogiativo - su di lui è stato scritto; sgombrare il campo da quella cortina di luoghi comuni che inevitabilmente fanno ombra intorno a scrittori che, come Levi (ma è stato il destino comune a tanti, da Pasolini a Sciascia, da Montale a Calvino: per citarne alcuni), protagonisti della vita sociale, politica e letteraria del loro tempo, hanno finito poi per "fare moda", sono i presupposti che danno vita a questa Nuova introduzione a Carlo Levi. Nuova, anche perché si rilegge, finalmente, Carlo Levi senza lo schermo della ideologia, che, al di là di ogni considerazione, è parte non indispensabile alla sopravvivenza di un Autore, soprattutto se questi volle, prima d'ogni cosa, essere un poeta. Quello che resta sono le intenzioni e le tensioni etiche, sempre indiscusse e indiscutibili nel caso di Carlo Levi. E restano, se restano, i risultati poetici. SULL'AUTORE Giovanni Caserta, noto per essere uno dei più aggiornati conoscitori della storia e della cultura lucana, di cui ha costantemente colto le relazioni con il più vasto panorama nazionale, è anche autore di saggi su scrittori

quali Ariosto, Leopardi, Collodi, Pavese, ecc. Per i nostri tipi ha pubblicato una Storia, della letteratura lucana (1993) e curato, con note e commento, l'edizione delle Rime di Isabella Morra (in A. Cambria, Isabella, 1.996).

Kuklo had spent his entire life in cages, feared and hated as "the Titan's son." Then he met Sharle Inocencio, a young girl who defied her father and brother to care for and educate the abused boy in secret -- and plot his escape from the dungeon, and her escape from her betrothal. But the night they've dreamed of brings new horrors with it, and Kuklo becomes obsessed with proving that he is not the monster everyone has always assumed him to be. That means meeting a Titan for himself, in person.

This bibliography on Sren Kierkegaard carries on the work of Jens Himmelstrup's international bibliography (1962). It collates everything written about Kierkegaard - books, contributions to edited collections, and journals - and also features an appendix of primary text editions and translations. Discussion notes, reviews, etc., are catalogued according to the items they refer to. The bibliography contains more than 5,600 primary entries and is a testament to the expanding worldwide interest in the Danish philosopher. It also remedies the deeply-felt need for a collected overview of the extensive literature on Kierkegaard.

Once hailed as humanity's greatest hope, Eren has since become unrecognizable. With the Attack Titan now morphed into a grotesque, colossal skeleton of its former self, Eren continues to control the wave of Titans laying waste to the world, extinguishing countless homes, towns, and lives in their wake. In order to salvage what's left of humanity, Mikasa, Armin, and the Survey Corps decide to confront Eren head-on. But to stop the Rumbling, they'll have to dedicate much more than their hearts... *Comedy and Tragedy in the Cinema of Roberto Benigni* Troubador Publishing Ltd

Eren's titanic Rumbling claims thousands of lives beyond the walls of Paradis, and the boy who once lived in fear of the Titans becomes the world's most feared man. Determined to stop the destruction wrought by their childhood friend, Armin, Mikasa, and their surviving comrades reach the Attack Titan and decide to face him head on in an ultimate showdown. Will humanity finally be set free from the cycle of fear, oppression, and destruction, or will the Titans outlive their victims? FINAL VOLUME!

This Italian textbook is divided into two parts. The first consists of texts and dialogues, which help the reader to have fun while learning Italian. This section is also peppered with grammar lessons. The second part uses a number of photos, which encourage students to speak about what they see. Its topics are culturally interesting, and include cities to visit, recipes and small biographies of famous Italian poets and writers. As such, the book is suitable for students who are at beginner and post-beginner levels; in other words, A1, A2, B1, and B2. Students of the latter level can use the first two parts of the book to revise what they have studied in the past and the third part to improve their vocabulary and their reading skills. One of the strengths of this book is in its recordings, which used several people with a range of different accents. Such variety of accents and voices represents a good training tool for the student of Italian. The book also includes contributions from Michela Dettori, Michela Esposito, Elsa Musacchio, Davide Renzi, Lea De Negri, Denise Pellini, Maria Andreana Deiana, Lia Renzi, Clara Lucci and Flavia Rovella, which serve to make it unique and interesting.
