English Language Education and Assessment Cambridge University Press  
 This book explores the responses of Chinese English teachers (CETs) and learners to the Native English-Speaking Teacher/Non-Native English-Speaking Teacher (NEST/NNEST) issue by examining the self-perceptions of Chinese English teachers, the perceptions of Chinese learners, and the real practices of the two groups of teachers in the classroom. It reveals how Chinese students' and teachers' perceptions are influenced by the combined forces of Chinese traditional culture and globalization, how Chinese English teachers' classroom practices reflect their perceptions, and how Chinese English teachers struggle to (re)construct their professional identity as English teachers in the dominant ideology and disempowering discourse of native-speakerism. The findings also shed light on the impacts of globalization on Chinese English teachers' professional identity and provide ways to empower them as English language teaching professionals. This book will appeal to a broad readership, including foreign-language teachers – especially NNESTs – around

the world, graduate students majoring in sociolinguistics, and scholars of globalization.

The spread of English is so much an integral part of globalization that it has become an essential global literacy skill. Each chapter covers a different jurisdiction, and is written by a scholar engaged in the implementation of

government policies on English language and teacher education, providing the reader with insiders' perspectives. Supplement to the Syllabus Language in the Primary School : English Modern Language Association

The study of the history of the English language (HEL) encompasses a broad sweep of time and space, reaching back to the fifth century and around the globe. Further, the language has always varied from place to place and continues to evolve today. Instructors face the challenges of teaching this vast subject in one semester and of engaging students with unfamiliar material and techniques. This volume guides instructors in designing an HEL course suited to their own interests and institutions. The essays consider what subjects of HEL to include, how to organize the course, and what textbook to assign. They offer historical approaches and those that are not structured by chronology. Sample assignments provide opportunities for students to conduct original research, work with archives and digital resources, and investigate language in their communities. The essays also help students question notions of linguistic correctness.
