Want to deliver a pitch or presentation that grabs your audience's ever-shrinking attention span? Ditch the colorful slides and catchy language. And follow one simple rule: Convey only what needs to be said, clearly and concisely, in three minutes or less. That's the 3-Minute Rule. Hollywood producer and pitch master Brant Pinvidic has sold more than three hundred TV shows and movies, run a TV network, and helmed one of the largest production companies in the world with smash hits like *The Biggest Loser* and *Bar Rescue*. In his nearly twenty years of experience, he's developed a simple, straightforward system that's helped hundreds—from Fortune 100 CEOs to PTA presidents—use top-level Hollywood storytelling techniques to simplify their messages and say less to get more. Pinvidic proves that anyone can deliver a great pitch, for any idea, in any situation, so your audience not only remembers your message

but can pass it on to their friends and colleagues. You'll see how his methods work in a wide range of situations—from presenting investment opportunities in a biotech startup to pitching sponsorship deals for major sports stadiums, and more. Now it's your turn. The 3-Minute Rule will equip you with an easy, foolproof method to boil down any idea to its essential elements and structure it for maximum impact. Simplify. Say less. Get More.

From James Dashner, author of the #1 New York Times bestselling MAZE RUNNER series, comes the second book in the bestselling Mortality Doctrine series, an edge-of-your-seat cyber-adventure trilogy that includes *The Eye of Minds* and *The Game of Lives*. Includes a sneak peek of *The Fever Code*, the highly anticipated conclusion to the Maze Runner series—the novel that finally reveals how the Maze was built! Michael thought he understood the VirtNet, but the truth he discovered is more terrifying than anyone at VirtNet Security could have anticipated. The

cyber terrorist Kaine isn't human. It's a Tangent, a computer program that has become sentient. And Michael just completed the first step in turning Kaine's master plan, the Mortality Doctrine, into a reality. The Mortality Doctrine will populate Earth entirely with human bodies harboring Tangent minds. The VNS would like to pretend the world is perfectly safe, but Michael and his friends know that the takeover has already begun. And if they don't stop Kaine soon, it will be game over for humanity. Praise for the Bestselling MORTALITY DOCTRINE Series: "Dashner takes full advantage of the Matrix-esque potential for asking 'what is real.'" —io9.com "Set in a world taken over by virtual reality gaming, the series perfectly capture[s] Dashner's hallmarks for inventiveness, teen dialogue and an ability to add twists and turns like no other author." —MTV.com "A brilliant, visceral, gamified mash-up of *The Matrix* and *Inception*, guaranteed to thrill even the non-gaming crowd." —Christian Science Monitor

In a world with no power, chaos soon descends. A

powerful look at the disintegration of society in the wake of a massive and mysterious outage that has knocked out all modern amenities. Fifteen-year-old Emma has moved house with her ex-Marine mother and younger brother. It's a brand-new condo building, which explains the semi-regular power outages, as workers complete the units around them. So Emma isn't particularly concerned when the latest blackout hits just as they are preparing to leave town on a long weekend camping trip. But then the car won't start, and their cellphones appear dead -- and all the cars outside their building seem to be stalled in a long traffic jam ... In the midst of what appears to be a massive power outage, with their camping gear packed and ready, Emma and her family canoe over to the islands, just offshore, to wait it out. But while they land on an isolated island, with a relatively hidden site, they are far from safe, as people become increasingly desperate to find food and shelter. And as the days pass, and the power remains out, the threat of violence becomes all too real.

 Princeton. Good Friday, 1999. On the eve of graduation, two friends are a hairsbreadth from solving the mysteries of the *Hypnerotomachia Poliphili*, a Renaissance text that has baffled scholars for centuries. Famous for its hypnotic power over those who study it, the five-hundred-year-old *Hypnerotomachia* may finally reveal its secrets—to Tom Sullivan, whose father was obsessed with the book, and Paul Harris, whose future depends on it. But when a longtime student of the book is

murdered just hours later, a chilling cycle of deaths and revelations begins—one that will force Tom and Paul into a fiery drama, spun from a book whose power and meaning have long been misunderstood.

 Nearly all of us want to be more productive, but finding the method that works for you among the hundreds and hundreds of different tips, tricks and hacks can be a daunting prospect. After graduating college, Chris Bailey decided to dedicate a whole year to doing just that - experimenting with as many of the techniques as he could, and finding the things that work. Among the experiments that he undertook are: going several weeks on little to no sleep; cutting out caffeine and sugar; taking a daily siesta; living in total isolation for 10 days; stretching his workweek to 90 hours; and getting up at 5:30 every morning, all the while monitoring the

impact of his experiments on the quality and quantity of his work. The results were often surprising! This book is the result of Chris's year-long journey, distilling the lessons he learned into a few core truths about how we get things done (or, indeed, don't). Among the many counterintuitive insights Chris discovered that had the biggest impact on his productivity were striving for imperfection; scheduling less time for important tasks; the 20 second rule to distract yourself from distractions; and the concept of productive procrastination. In this accessible and fun guide, Chris Bailey offers over 30 tried-and-tested best practices that will help everyone to accomplish more - and become more awesome.

Adam has killed again. It had to be done, part of him knows that, but it changes a person. It can certainly change a teenager who's already grown up too quickly, too harshly, in the wake of the catastrophic global blackout five months ago. Adam wants to hope, wants to be what his girlfriend Lori wants him to be—but there's always a threat tugging at the edges of his consciousness. What's lurking in the dark is a greater danger than ever before: somebody who wants to destroy the Neighborhood and stop their strategic alignments with other powerful enclaves. **The Rule of Three: Will to Survive** Skyscape

The changing relationship between East and West, principally between China and America, has brought the whole matter of achieving peaceful and harmonious relations between nations to the fore — particularly with regard to China's recent ascendancy in world affairs. Competition among nations with different forms of governance raises important questions such as: What forms of governance work best to enable people to have harmonious and peaceful

life together — both within and amongst nations? What principles can we discover in human history that might point us toward some answers to this fundamental governance question? What might the answers from the past suggest about the future? Where might the future lead? To find answers to these questions, we set out upon a discovery adventure, going back some 30,000 years in time — to trace the evolutionary progress in human governance from the hunter-gatherer period until today. We also adopted a framework provided by Dr Stephen Pinker's landmark study of the nature of violence over time entitled *The Better Angels of Our Nature* to provide context and contrast to our own discoveries. We discovered several basic principles: First, the forms of human governance made an evolutionary progress over the past 30,000 years. Second, the most basic driver for this progress was and still is technological change, which forces complementary changes in governance — or seals institutional failure. Third, we discovered that just three basic factors

determined whether a particular form of governance succeeded in flourishing as a tribe, nation, empire or nation-state. Those fundamental factors are: boundaries, founding mythology, and the Rule of Three. Indeed, our most fundamental finding has been the Rule of Three itself: the principle that says that dyads have inherently unstable natures, whereas triads — like three-legged stools — possess inherent stability. Throughout time, the most successful human arrangements have been those with intricate hierarchies of governance that have the Rule of Three deeply woven into each level. As for the future, we claim that the best international structure would take the symbolic form of an archipelago of nations interconnected with a system of bridges — where each bridge consists of an intercourse route between two nations, and the nature of the intercourse is largely trade in goods and services followed by cultural exchanges of ideas. A Basic Principle: It is far easier to build bridges between nations than to rebuild nations in some other nation's image. Bad actors

amongst nations may then get dealt with as villagers used to deal with nasty neighbors — through shunning and shaming, where shunning means the ceasing of trade intercourse. It is ideal for any hospital doctor, generalist, or even senior medical student who may need a cardiology opinion, or for that matter.
