The baby owls came out of their house, and they sat on the tree and waited. A big branch for Sarah, a small branch for Percy, and an old piece of ivy for Bill. When three baby owls awake one night to find their mother gone, they can't help but wonder where she is. Stunning illustrations from unique and striking perspectives capture the owls as they

worry about their mother: What is she doing? When will she be back? What scary things move all around them? Not surprisingly, a joyous flapping and dancing and bouncing greets her return, lending a celebratory tone to the ending of this comforting tale. Never has the plight of young ones who miss their mother been so simply told or so beautifully rendered.

This volume focuses on innovative approaches to teaching foreign language courses offered to non-language degree students. It includes essays related to the innovative use of ICTs, new developments in methodology, approaches to course and materials design, and the contribution of language theory to foreign language teaching. As the book brings together researchers and practitioners working in a variety of contexts, it provides detailed insight into ways the same challenges are dealt with in different educational environments. The ideas and experiences analysed in this collection of essays will appeal to anyone interested in the current trends

in foreign language teaching and learning, particularly educationalists.

The best practices in FLT that the book offers will be a source of inspiration for in-service teachers and course designers, while the theoretical backgrounds provided in each chapter will be valuable to pre-service teachers and stimulating to researchers.

Higher education is a driving force behind enhancing competitiveness for economies in the global market; however, a myriad of obstacles can pose significant challenges to students seeking such opportunities. *Accelerated Opportunity Education Models and Practices* is a pivotal reference source for the latest scholarly research on emerging initiatives in academic

institutions that implement expedited educational programs across the globe. Examining the benefits that stem from enabling students to complete their university degrees in a shorter timeframe, this book is ideally designed for administrators, researchers, academicians, and educators interested in guidelines and frameworks necessary to provide accelerated education options at the collegiate level.

English is one of the most common languages that is used by a majority of the people worldwide. In statistical terms, approximately 20% of the world's population uses the English language as their primary or secondary language. The word 'English' is derived from the

word 'Anglisc' which means the speech of the Angles. English has found its use in conducting business, aviation, and computing overseas and in many other areas so that all the people can converse with each other through a common language. In the current times, the economy has started to become increasingly global because of which the usage of Business English has become highly important. Business English refers to the use of English language for conducting business. Business English lays its focus on the English skills that are necessary for one to possess in order to communicate within a global business environment. There are a variety of different subjects that are included within Business English such as Economics, Commerce, E-Commerce,

Finance, HR, Insurance, IT, Law, Manufacturing, Marketing, Production, Stock Exchange, Trade, Transport, and many others. Within the field of conducting trade and business, Business English is used for providing training to the delegates, guidance, and counseling, boosting of morale, appreciating a well-done work, imparting instructions, giving the warning and for conveying suggestion, opinion, advice, request etcetera to the people.

A Golden Key for Learning Foreign & English Language Lulu Press, Inc

The present book has been written for teachers and students of English as a second language (L2, henceforth) and considers the three educational levels, namely, school, college and university.

They will find it as a useful resource since it provides readers with insights, suggestions and approaches to implement the so-called Information and Communication Technology (ICT, henceforth) tools to develop the four language skills, namely, reading, writing, listening and speaking, along with a grammar knowledge. More specifically, this book will contribute to help L2 English teachers in designing creative and motivating lesson plans in which L2 English students will learn English through the use of ICT tools while developing several competences such as the digital competence, the learning to learn (that is to say, they learn by doing), autonomy and an active role given they are responsible for their own learning. In this student-centred

approach, the teacher is a guide and a facilitator of resources. The resources described in this book will foster L2 English teachers and L2 English learning to consider that lesson plans are more effective when the teacher has determined the learning and teaching objectives for both ICT and English. A detailed explanation regarding how each ICT tool functions is provided in the corresponding chapters so that L2 English teachers are able to build standing selection criteria when applying each ICT tool in the classroom.
