Offers a comprehensive account of all conventional indications for laser-assisted dentistry, including cavity preparation, endodontics, and periodontal therapy, as well as recent advancements such as laser-assisted bleaching, soft laser applications, and the treatment of

hypersensitive cervical areas. For each indication, detailed instructions on the use of the laser are provided in both text and illustrations to allow even novices to make successful, responsible, and immediate use of this innovative technology. In addition, each chapter presents its topic in the context of the underlying scientific concepts and a thorough and up-to-date review of the extant literature. The book also features in-depth discussion of all available wavelengths and their specific applications to guide readers in the purchase of a new laser system as well as

extensive case reports to demonstrate achievable therapeutic outcomes and allow readers to compare their results with those of other users. Oral Laser Application is an invaluable guide for all clinicians currently using or wishing to integrate laser-assisted dentistry in their practice.

Nothing should come between best friends, not even boys. ESPECIALLY not boys. Natalie and Brooke have had each other's backs forever. Natalie is the quiet one, college bound and happy to stay home and watch old movies. Brooke is the movie—the life of every party, the girl everyone wants to be. Then it happens—one crazy night that Natalie can't remember and Brooke's boyfriend, Aiden, can't forget. Suddenly there's a question mark in Natalie and Brooke's friendship that tests everything they thought they knew about each other and has both girls discovering what true friendship really means.

'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at

the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

Feline Dentistry Quintessence Publishing Company Incorporated

This book is designed to help dentists in general practice to improve the results of prosthetic procedures in medically compromised and elderly patients. In particular, it critically scrutinizes various

dogmas that govern practitioners' approaches yet lack sound scientific support and often have an adverse effect on outcomes. Attention is drawn to straightforward procedures that offer significant clinical benefits and to aspects that are too often neglected, such as the impact of systemic diseases. New light is cast, for example, on the taking of dental impressions, the treatment of malocclusions, the making of jaw relation records, the relationship between denture quality and patient satisfaction, and the use of implant-supported overdentures versus traditional complete prostheses (dentures). As Albert Einstein once said, "It is what we think we know that prevents us from learning more." Readers will find that this book helps them to re-examine taken-for-granted elements of their practice, leading to improved care and patient satisfaction.

Since the Cultural Revolution, data have been uncovered to illuminate that tumultuous decade. In this volume 13 scholars examine the gap between the ideology of the Revolution and the harsh and contradictory reality of its outcome. They focus particularly on the violence, coercion, and constant tension between the need for centralization to enforce policies and the need for decentralizing decision-making if those goals were to be achieved.
