 Ryūnosuke Akutagawa (1892-1927) is one of Japan's foremost stylists - a modernist master whose short stories are marked by highly original imagery, cynicism, beauty and wild humour. 'Rashōmon' and 'In a Bamboo Grove' inspired Kurosawa's magnificent film and depict a past in which morality is turned upside down, while tales such as 'The Nose', 'O-Gin' and 'Loyalty' paint a rich and imaginative picture of a medieval Japan peopled by Shoguns and priests, vagrants and peasants. And in later works such as 'Death Register', 'The Life of a Stupid Man' and 'Spinning Gears', Akutagawa drew from his own life to devastating effect, revealing his intense melancholy and terror of madness in exquisitely moving impressionistic stories.

 Ryan Knighton's humorous and perceptive tales of fatherhood take us inside an unusual new

family, one bound by its father's particular darkness and light. C'mon Papa is Ryan Knighton's heartbreaking and hilarious voyage through the first year of fatherhood. Becoming a father is a stressful, daunting rite of passage to be sure, but for a blind father, the fears are unimaginably heightened. Ryan will have to find novel ways to adapt to nearly every aspect of parenting: the most basic skills are nearly impossible to contemplate, let alone master. And how will Ryan get to know this pre-verbal bundle of coos and burps when he can't see her smile, or look into her eyes for hints of the person to come? But this is no pity party, and Ryan has no time for sentimentality. Tackling these hurdles with grace and humour, Ryan is determined to do his part - and this is where the fun starts. From holding his daughter as she wails into the night to their first nerve-racking walk to the cafe, no activity between father and daughter is without its pitfalls. In his struggle to "see" Tess, Ryan reimagines the relationship between father and child during that first chaotic year.

Lifts and Escalators Knopf Canada

A guide to the key technical aspects to be considered in generating, understanding and evaluating tall building proposals. This book covers urban design, architecture, engineering, life safety, construction economics, market economics and building occupancy. It's geographical context is

primarily the UK, with a focus on London.

Encyclopædia of Religion and Ethics Bloomsbury Publishing

David Hume wrote that Berkeley's arguments `admit of no answer but produce no conviction'. This book aims at the kind of understanding of Berkeley's philosophy that comes from seeing how we ourselves might be brought to embrace it. Berkeley held that matter does not exist, and that the sensations we take to be caused by an indifferent and independent world are instead caused directly by God. Nature becomes a text, with no existence apart from the spirits who transmit and receive it. Kenneth P. Winkler presents these conclusions as natural (though by no means inevitable) consequences of Berkeley's reflections on such topics as representation, abstraction, necessary truth, and cause and effect. In the closing chapters Proefssor Winkler offers new interpretations of Berkeley's view on unperceived objects, corpuscularian science, and our knowledge of God and other minds.

Document 1 - a Collection of Drawings and Paintings by Kevin M. Wueste New York : Ellis Horwood
 The FreeCAD 0.18 Basics Tutorial book is an essential guide for engineers and designers without any experience in computer-aided design. This book teaches you the basics you need to know to start using FreeCAD with easy to understand, step-by-step tutorials. The author begins by getting

you familiar with the FreeCAD interface and its essential tools. You will learn to model parts and create assemblies. Next, you will learn some additional part modeling tools, create drawings, create sheet metal, perform finite element analysis, generate toolpaths for manufacturing. Running PressBook Pub

This is a reference source for practising engineers specializing in electric power engineering and industrial electronics. It begins with the basic dynamic models of induction motors and progresses to low- and high-performance drive systems.

A future archeologist finds the remnants of a mysterious ancient people—us—in a wry satire that is “a marvel of imagination and . . . wonderfully illustrated” (The New York Times). It is the year 4022, and the entire ancient country of Usa has been buried under many feet of detritus from a catastrophe that occurred back in 1985. Howard Carson, an amateur archeologist, is crossing the perimeter of an abandoned excavation site when he feels the ground give way beneath him.

Suddenly, he finds himself at the bottom of a shaft, which, judging from the DO NOT DISTURB sign hanging from an archaic doorknob, is clearly the entrance to a still-sealed burial chamber. Carson's incredible discoveries, including the remains of two bodies, one laid to rest on a ceremonial bed facing an altar that appeared to be a means of communicating with the Gods and the other lying in a porcelain sarcophagus in the Inner Chamber. These dramatic discoveries give Carson all the clues he needs to piece together the entire civilization—which he gets utterly wrong. The acclaimed author and illustrator of *Castle and Pyramid*, David Macaulay presents a wonderfully tongue-in-cheek satire of both historical presumption and American self-importance.

From Here to There celebrates these ephemeral documents—usually forgotten or tossed aside after having served their purpose—giving them their due as artifacts representing stories from people's lives around the world. There is the young woman suffering from juvenile rheumatoid arthritis who created maps of the Humira injections on her stomach and thighs to help her remember the sites, and give them time to heal. Or the young boy who imagined a whole country for ants and put it to paper. Lucas from Australia drew an obsessively detailed map of his local traffic island, and a teenage girl contributed a map of her high school locker. Two American tourists got lost in the Bulgarian mountains following the hand drawn map of a local, and Brittany from Denmark drew directions to an animal rights protest in Copenhagen. The maps featured in *From Here to There* are as varied and touching as the stories they tell.

Explore Japan with the smartest and shrewdest guidebook on the market. Fully updated and expanded, this stunningly illustrated travel guide brings you superb coverage of all the country's unmissable experiences, from staying in a cosy ryokan and soaking in an onsen bath to climbing snow-capped Mount Fuji and watching a titanic bout of sumo. Get up-to-the minute tips on contemporary Japan, from Kyoto's burgeoning street-food scene to Tokyo's up-and-coming hipster hubs, and read expert background on everything from anime to Zen. Packed with advice on all the

best places to eat, sleep, drink and party - on every budget - this new edition of *The Rough Guide to Japan* covers Japan with our trademark mix of candour, insight and practical advice. Full colour maps and Japanese characters are given throughout to help navigate this bewildering and bewitching country. Make the most of your trip with *The Rough Guide to Japan*. Winner of the Top Guidebook Series in the Wanderlust Reader Travel Awards 2017.

CATIA V5 Tips and Tricks by Emmett Ross contains over 70 tips to improve your CATIA design efficiency and productivity! If you've ever thought to yourself “there has to be a better way to do this,” while using CATIA V5, then know you're probably right. There probably is a better way to complete your tasks you just don't know what it is and you don't have time to read a boring, expensive, thousand page manual on every single CATIA feature. If so, then *CATIA V5 Tips and Tricks* is for you. No fluff, just CATIA best practices and time savers you can put to use right away. From taming the specification tree to sketching, managing large assemblies and drawings, *CATIA V5 Tips and Tricks* will save you time and help you avoid common stumbling blocks.

Learn the science and art of creating a one-of-a-kind bamboo fly rod. Fly fishing has a long and storied history. While many flyfishermen will find and purchase their favorite fly rod, there are those who desire to go a step further. For those discerning flyfishermen and women, simply buying a rod is not enough—they must build one. And just as fly fishing is an art, so is the creation of the bamboo fly rod. Many people believe that the best-feeling rods, particularly for trout fishing, are made from bamboo, and today's bamboo rod-making tradition is particularly indebted to one man: Everett E. Garrison. Using principles he learned as an engineering student, Garrison created an exacting method of building rod—a method that for decades was a well-kept secret. These techniques are presented to the reader in *A Master's Guide to Building a Bamboo Fly Rod*, a classic volume written by Hoagy B. Carmichael to honor and maintain Garrison's legacy. Completely illustrated with black-and-white drawings and over three hundred and sixty black-and-white photographs, along with copious notes on the mathematical and engineering principles that

underlie Garrison's unique rod-making technique, this book will guide you through each step of creating a classic bamboo fly rod. Skyhorse Publishing is proud to publish a broad range of books for fishermen. Our books for anglers include titles that focus on fly fishing, bait fishing, fly-casting, spin casting, deep sea fishing, and surf fishing. Our books offer both practical advice on tackle, techniques, knots, and more, as well as lyrical prose on fishing for bass, trout, salmon, crappie, baitfish, catfish, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Think big, act small... Act now... Many of us think big but fail to micro plan. Others get stuck at micro-planning, missing the 'big picture' of what impacts us nationally and globally. Housing is a basic necessity of human beings across the globe, and not just in India. Affordable housing for the masses is a key challenge for governments and policy makers. In *Nano Housing*, Dr Suresh Haware brings out a detailed study and offers solutions for the housing needs of India and its states and cities. A path-breaking and time-tested concept, nano housing is the outcome of an in-depth practical research which has the potential to fulfill the dream of the common man-an affordable house at an affordable price. Further, the book addresses the impact of GST, RERA and demonetisation on real estate; analyses REIT, home finance and rental housing; and voices the concern of homeless people, unauthorised housing, redevelopment and many other aspects of housing. An innovative and revolutionary idea, *Nano Housing* is a must-read for all businessmen in general and professionals, economists, sociologists, officials and policy makers engaged in the housing industry in particular.
