This book explains the nuts and bolts of affordable housing development. Divided into two complementary sections, the book first provides an overview of the effectiveness of existing federal and state housing programs in the United States, such as the LIHTC and TIF programs. In turn, the book's second section presents an extensive discussion of and insights into the financial feasibility of an affordable real estate development project. Researchers, policymakers and organizations in the public, private and nonprofit sectors will find this book a valuable resource in addressing the concrete needs of affordable housing development. "Luque, Ikromov, and Noseworthy's new book on Affordable Housing Development is a "must read" for all those seeking to address the growing and vexing problem of affordable housing supply. The authors provide important insights and practical demonstration of important financial tools often necessary to the financial feasibility of such projects, including tax-increment financing and the Low-Income Housing Tax Credit. Further, the authors provide important backdrop to the affordability crisis and homelessness. I highly recommend this book to all who seek both to articulate and enhance housing access." By Stuart Gabriel, Arden Realty Chair, Professor of Finance and Director, Richard S. Ziman Center for Real Estate at UCLA "Over several years Jaime Luque, Nuriddin Ikromov and William Noseworthy applied their analytical bent, and no small measure of empathy, to homelessness as actually experienced in Madison, Wisconsin - and they inspired multiple classes of urban economics students to join them. "Homelessness" is a complex web of issues affecting a spectrum of populations, from individuals struggling with addiction or emotional disorders, to families who've been dealt a bad hand in an often-unforgiving economy. Read this book to follow Jaime, Nuriddin, and William as they evaluate a panoply of housing and social programs, complementing the usual top-down design perspective with practical analysis of the feasibility of actual developments and their effectiveness. Analytical but written for a broad audience, this book will be of interest to anyone running a low-income housing program, private and public developers, students, and any instructor designing a learning-by-doing course that blends rigor with real-world application to a local problem." By Stephen Malpezzi, Professor Emeritus, James A. Graaskamp Center for Real Estate, Wisconsin School of

Business, University of Wisconsin-Madison, and Dean, Weimer School of the Homer Hoyt Institute.

Praise for Developing Affordable Housing A Practical Guide for Nonprofit Organizations Third Edition "Ben Hecht's book explains in clear language everything needed to successfully engage in nonprofit housing development. He tells how to find the money, how to generate good design and quality construction, and how to improve management--a complete, well-researched, and well-presented 'A to Z' approach." --Henry G. Cisneros, former secretary U.S. Department of Housing and Urban Development "Ben Hecht's book makes the affordable housing development process accessible for communities and practitioners everywhere. Developing Affordable Housing should be on the bookshelf of every organization that cares about people and wants to make affordable housing possible." --Rey Ramsey, former chairman, Habitat for Humanity CEO, One Economy Corporation "The development of affordable housing is as much a journey as a destination. Ben Hecht's book provides maps and bridges while not losing sight of the challenging but elusive goal of providing decent, safe, and affordable housing." --Nicolas P. Retsinas, Director, Joint Center for Housing Studies Harvard University "In our work to increase the supply of safe, decent homes for those

who need homes the most, we appreciate the power of partnerships and the value of information. So does Ben Hecht.

Developing Affordable Housing is more than a practical guide for nonprofits--it's a library, a trusted advisor, and a road map. Read this book and benefit from its wisdom." --Stacey D. Stewart, President and CEO, Fannie Mae Foundation

This book is intended for professionals who are beginning the process of learning about the federal low-income housing tax credit ("Housing Credit," also known as LIHTCs). Even the most capable student cannot obtain a working knowledge by reading one, or even several publications on the subject. The rules and practices are too complex, particularly for compliance. But every journey starts somewhere, and this book will help with your first application/allocation/closing/property whichever role brings you to this industry." *Financial Feasibility, Tax Increment Financing and Tax Credits* Beginner's Guide to the Housing Credit

### **The Housing Monitor**

The Affordable Housing Reader brings together classic works and contemporary writing on the themes and debates that have animated the field of affordable housing policy as well as the challenges in achieving the goals of policy on the ground. The Reader - aimed at professors, students, and researchers - provides an overview of the literature on housing policy and planning that is both comprehensive and interdisciplinary. It is particularly suited for graduate and undergraduate courses on housing policy

offered to students of public policy and city planning. The Reader is structured around the key debates in affordable housing, ranging from the conflicting motivations for housing policy, through analysis of the causes of and solutions to housing problems, to concerns about gentrification and housing and race. Each debate is contextualized in an introductory essay by the editors, and illustrated with a range of texts and articles. Elizabeth Mueller and Rosie Tighe have brought together for the first time into a single volume the best and most influential writings on housing and its importance for planners and policy-makers.
