 The powertrain control module (PCM), or engine control unit (ECU), is a circuit board computer that stores information pertaining to different areas of your Mazda's engine. If your Mazda's check engine light or another malfunction indicator light illuminates, it is because of a signal the PCM received. The PCM ...

 A car's engine control module (ECM) is a computer system that acts as the "brain" of a car. This little computer analyzes lots of information in order to control the car's performance. When the ECM fails, it will greatly hurt the engine's performance. At its worst, a bad ECM may even result to a car not starting.
