"Cleverly blending the real and imagined worlds until the reader can't differentiate the two, Knox has created a twisty, turny thriller that cuts through the heart of the modern true crime fascination, all while keeping us enraptured by it."—BuzzFeed THE #1 INTERNATIONAL BESTSELLER!

What happens to all the girls who go missing? The thrilling story of a university student's sudden disappearance, the woman who became obsessed with her case, and the crime writer who uncovered the chilling truth about what happened... In 2011, Zoe Nolan walked out of her dormitory in Manchester and was never seen or heard from again. Her case went cold. Her story was sad, certainly, but hardly sensational, crime writer Joseph Knox thought. He wouldn't have given her any more thought were it not for his friend, Evelyn Mitchell. Another writer struggling to come up with a new idea, Evelyn was wondering just what happens to all the girls who go missing. What happens to the Zoe Nolans of the world? Evelyn began investigating herself, interviewing Zoe's family and friends, and emailing Joseph with chapters of the book she was writing with her findings. Uneasy with the corkscrew twists and turns, Joseph Knox embedded himself in the case, ultimately discovering a truth more tragic and shocking than he could have possibly imagined... Just remember: Everything you read is fiction. Praise for True Crime Story: "Stunningly unique...For fans of stories with a little something extra, this book is set up like an oral history, complete with emails, newspaper clippings and photos that propel the story all the way to a shocking and satisfying conclusion." —Newsweek "Mr. Knox is a fantastic writer. His ambitious fourth novel satirises and celebrates the true-crime genre with glee. True Crime Story, by turns horrific and hilarious, is scandalously entertaining." —The Times (UK) "The gifted Joseph Knox continues his upwards trajectory with True Crime Story forging something original and innovative."

—Financial Times (UK) "This is one of the most engaging cold-case novels I have read." —Literary Review (UK)

Chronicles the life and career of the noted researcher into the nature of human sexuality

Ah, Music! Routledge

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985.

Contributions range from mathematics

and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and o (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Enough About Me equips you with practical tools to find meaning and compassion in even the smallest of everyday choices. What if your path to a more successful, healthy, and satisfying life is actually not about you? When his father was diagnosed with Alzheimer's disease, Richard Lui did something tough.

The award-winning news anchor decided to set aside his growing career to care for family. Selflessness, however, did not come easily. So, Richard set out to explore why he struggled. In every decision, big and small, Lui discovered hidden opportunities to put others ahead of himself. Similar to training physical muscles, we must train our decision-making muscles to choose others over ourselves in order to have unexpected smiles and renewed balance in our lives. From a journalist's point of view, he digs into and shares stories from his seven-year "selfless" exploration. Lui shares practical tips, tools, and mnemonics learned along the way to help shift the way we think and live: Selfless decision methods and practices for work, home, relationships, and community Studies and research which show the personal benefits of being selfless A pragmatic debate on whether selflessness is even possible Practical, bite-sized ways to be selfless Entertaining and shareable stories to inspire you to selflessness Lui ultimately shares how small choices toward selflessness are not a compromise, but instead a way to a more satisfying life. Choice by choice, step by step, the path to a more satisfying and fulfilling journey is right here in the people around us.

Shaping Entrepreneurship Research: Made, as Well as Found is a collection of readings designed to support entrepreneurship research. Focused on a worldview in which the future is open-ended and shapeable through human action - i.e. "made", this collection reframes entrepreneurship as a science of the artificial rather than as a natural or social science. It posits an open-ended universe for the making of human artifacts even if large swathes of nature and society are not within the control of the people making them. The book explores the notion of "made" through 25 foundational readings - classics from the history of ideas. Organized into five sections, each classic is individually introduced by the editors in one of five chapters written to explain its relevance and significance for a "made" view of entrepreneurship. Readers will benefit from exposure to these classic ideas and ongoing research in a variety of areas that fall somewhat outside the line-of-sight of traditional entrepreneurship research. Both individually and collectively, the readings suggest opportunities to ask new questions and develop new ways of framing entrepreneurship research that carry the discussion beyond worlds found to worlds made as well as found. The book is crafted to be valuable to three groups of scholars: young scholars with limited or no access to research infrastructure but with a desire to participate in deep conversations; young scholars with access

to research infrastructure who also desire to listen-in on a different kind of conversation; and established entrepreneurship scholars who are contemplating an alternative set of foundational ideas to support their conversations in the discipline.
