The Business Model: How to Develop New Products, Create Market Value and Make the Competition Irrelevant John Wiley & Sons

A MUST HAVE FOR VISIONARIES, ENTREPRENEURS, EXECUTIVES AND CONSULTANTS WITH A GAME CHANGING ATTITUDE This is not a fiction or non-fiction book. It is also not a workbook. So what is it then? This book consists of several worksheets. To be precise: 100 blank business model canvases. Since worksheet did not sound appealing enough, we chose "playbook". A playbook contains a sports team's strategies and plays. Very similar to a business model of startups / companies. WHAT IS A CANVAS? Alexander Osterwalder's business model canvas presents a visual overview of the nine components of any business on one page. This page has nine boxes that depict the details of a company's product, customers, channels, demand creation, revenue models, partners, resources,

activities and cost structure. HOW SHOULD I USE THIS PLAYBOOK? What exactly you do with it is up to you. I personally recommend you fill the canvases with your ideas, guesses, visions and strategies, than you experiment and test things in real life and change your business model along the way. To do it the right way I highly recommend reading: 1. Business Model Generation by Alexander Osterwalder & Yves Pigneur. The inventors of the business model canvas. A must! Enough said. 2. The Lean Startup by Eric Ries. Successfully launch your startup and prevent failure. 3. The Startup Owner's Manual by Steven Blank & Bob Dorf: As stated by Blank & Dorf, 2012 in The Startup Owner's Manual "As a startup moves through the Customer Development process, it will use the business model canvas as a scorecard, by posting the hypotheses about each component of the model and then revising the hypotheses as the founders gather facts. Think of your first version of the business model canvas as the starting point showing the hypotheses that must be confirmed in face-to face or online interaction with customers. (...) Using the business model canvas as a guide makes it easier to figure out where and how to pivot, since the team can visually diagram its alternatives and see what it needs to change. Each time the founders iterate or pivot in response to customer feedback, they draw a new canvas showing changes. Over time, these multiple canvases form a "flip book" that shows the evolution of the business model." (Steven Blank & Bob Dorf, 2012)

This book finally gives innovators an alternative to the painful writing of business plans. Not only an alternative but also a more effective, faster and easier way to convince investors and decision-makers: the Opportunity Case is a more user-friendly way of analyzing and presenting a project, which has been quickly adopted by many multinational corporations, public sector organizations as well as start-ups. It also addresses a central problem in existing businesses: many people have good ideas but very few of these innovations are actually implemented. The content of this book proposes the first practical process that has been demonstrated to boost innovation by up to 56%. "Winning Opportunities" presents the IpOp Model that outlines in a very concrete and down-to-earth way, the core process of innovation that successful entrepreneurs and intrapreneurs use, even unconsciously. The model acts as a simple hands-on guide for innovators who want to increase their chances of success. This structured and user-friendly roadmap helps innovators turn an idea into a tangible opportunity, outline measurable deliverables, learn how to address all the key issues critical to the success of their project, and identify early in the process whether an opportunity is worth pursuing. To illustrate its concepts, a large number of real-life examples are included as inspiration to the reader. Nespresso's strategy is used throughout the book to demonstrate each key step of the IpOp Model. It is the first time in print one can read about the strategy that shaped the fascinating success story of Nespresso, a \$3 billion business with double-digit annual growth. Both Nespresso and the IpOp Model were developed in Switzerland, which was recently ranked No. 1 in innovation worldwide. Besides helping start-up initiators, the IpOp Model, as best practice for innovation, improves and complements the existing selection of innovation processes used by large organizations (staged gate, six sigma, etc.). Since learning is easier when emotions are included in the process, each chapter is preceded by a joke illustrating its serious content. The author, Prof. Raphael H Cohen took advantage of his 30+ years experience as serial entrepreneur, active CEO and business angel to write this book to encapsulate some of the key messages he has been teaching in top business schools and corporate environments since 2001. He is a keynote speaker and an expert in both professional agility and "weapons of mass innovation." Besides his

responsibility as academic director of MBA programs, he provides executive education, mentoring, consulting and management services for senior executives, bankers, directors and entrepreneurs.

He serves on the board of directors of several companies, including a Swiss bank, and is a regular contributor to several business publications. He obtained his Ph.D. in Economics in 1982"
