A spine-tingling tale of book bonding. In this wordless story, a little boy finds a book that he loves at the library. It's a match made in kid lit heaven. But not for the book. Sometimes the little boy's excitement gets the better of him and the book suffers from possibly too much love: bent pages, tears, hugs, tossing, and shaking. The poor book requires first aid from his friends. Every time the boy comes to the library, the books hide and plan escape routes. But when the book gets away from imminent danger in the boy's hands, the look of loss in the boy's eyes is enough to turn a tragic tale into a love story. The boy soon learns that the book is not just an object and is so much more on the inside. He loves the story the book gives him more than the fun he had playing with it. Bob Kolar's charming and hilarious illustrations show how sometimes our love for a good book can be too much, but with a more gentle touch, books can give us much comfort and joy.

When Richard Nisbett showed an animated underwater scene to his American students, they zeroed in on a big fish swimming among smaller fish. Japanese subjects, on the other hand, made observations about the background environment...and the different "seeings" are a clue to profound underlying cognitive differences between Westerners and East Asians. As Professor Nisbett shows in *The Geography of Thought* people actually think - and even see - the world differently, because of differing ecologies, social structures, philosophies, and educational systems that date back to ancient Greece and China, and that have survived into the modern world. As a result, East Asian thought is "holistic" - drawn to the perceptual field as a whole, and to relations among objects and events within that field. By comparison to Western modes of reasoning, East Asian thought relies far less on categories, or on formal logic; it is fundamentally dialectic, seeking a "middle way" between opposing thoughts. By contrast, Westerners focus on salient objects or people, use attributes to assign them to categories, and apply rules of formal logic to understand their behaviour.

My attic is the same as ever: quiet, lonely, sad. I'm going to write *The Novel of the Short-Sighted Adolescent*. But I'll write it as if I'm writing the author's *Diary*. My book won't be a novel, but a collection of comments, notes, sketches for a novel. It's the only way of capturing reality, both natural and dramatic at once - See more at:

f The short-sighted adolescent is a passionate reader who takes various cultural figures as models, trying to emulate both their lives and their works. The pupil protagonist is a poor student, who likes science and reads a lot of books, sometimes staying up all night to do so. At the age of 15, he decides to write a novel to demonstrate to his teachers that he is not as mediocre as all the other students, and is prepared to give up everything he holds dear for his art. The novel is written in a number of notebooks--the "diary" of the title--but our myopic hero ultimately fails in three subjects and is too lazy to learn and has to repeat the school year. *Diary of a Short-Sighted Adolescent* was written by the young Mircea Eliade, one of Romania's greatest writers and intellectuals. The book can be viewed as an early 20th century *Catcher in the Rye*, and allows us an intimate view of the developing genius--his teachers, his classmates' academic and amorous rivalries, his first sexual experiences--and an introduction to the themes of religion, self-knowledge, erotic sensibility, artistic creation, and otherness; ideas which would preoccupy him until the end of his life.

Inspired by his time spent with wise sages in Asia in the 1930s, Paul Brunton (1898-1981) wrote *The Hidden Teaching Beyond Yoga* (and its companion volume *The Wisdom of the Overself*) at the request of these remarkable teachers, who recognized that he had a significant role to play in the transmission of Hindu Vedanta and Buddhism to the West. Brunton's books are a profound re-creation of the teachings of those two philosophical schools of thought, informed by the insights of deep meditation. Clearly written without the specialized vocabulary found in those traditions, the books speak directly to the contemporary spiritual seeker. *The Hidden Teaching Beyond Yoga* is a step-by-step guide to actually experiencing the spiritual truth that reality is formed within our consciousness rather than outside us in the world of material things. Brunton's expert analysis of perception, grounded in science, is designed to awaken us to our sacred foundation and to transform our personality into a mirror of that reality. Brunton prepares us for this journey by describing the attitudes, mental disciplines, and character traits that are beneficial for success in this quest. This new edition has been updated to incorporate the author's final revisions and includes an introduction by the Paul Brunton Philosophic Foundation. Contents

Probability and Mathematical Statistics: An Introduction provides a well-balanced first introduction to probability theory and mathematical statistics. This book is organized into two sections encompassing nine chapters. The first part deals with the concept and elementary properties of probability space, and random variables and their probability distributions. This part also considers the principles of limit theorems, the distribution of random variables, and the so-called student's distribution. The second part explores pertinent topics in mathematical statistics, including the concept of sampling, estimation, and hypotheses testing. This book is intended primarily for undergraduate statistics students.

The Prague Cemetery is the #1 international bestseller from the award-winning and New York Times best-selling author of *The Name of the Rose*, Umberto Eco. "Vintage Eco...the book is a triumph."—New York Review of Books Nineteenth-century Europe—from Turin to Prague to Paris—abounds with the ghastly and the mysterious. Jesuits plot against Freemasons. Italian republicans strangle priests with their own intestines. French criminals plan bombings by day and celebrate Black Masses at night. Every nation has its own secret service, perpetrating forgeries, plots, and massacres. Conspiracies rule history. From the unification of Italy to the Paris Commune to the Dreyfus Affair to The Protocols of the Elders of Zion, Europe is in tumult and everyone needs a scapegoat. But what if behind all of these conspiracies, both real and imagined, lay one lone man? "Choreographed by a truth that is itself so strange a novelist need hardly expand on it to produce a wondrous tale...Eco is to be applauded for bringing this stranger-than-fiction truth vividly to life."—New York Times

The Big Green Tent epitomizes what we think of when we imagine the classic Russian novel. With epic breadth and intimate detail, Ludmila Ulitskaya's remarkable work tells the story of three school friends who meet in Moscow in the 1950s and go on to embody the heroism, folly, compromise, and hope of the Soviet dissident experience. These three boys—an orphaned poet; a gifted, fragile pianist; and a budding photographer with a talent for collecting secrets—struggle to reach adulthood in a society where their heroes have been censored and exiled. Rich with love stories, intrigue, and a cast of dissenters and spies, The Big Green Tent offers a panoramic survey of life after Stalin and a dramatic investigation into the prospects for individual integrity in a society defined by the KGB. Each of the central characters seeks to transcend an oppressive regime through art, a love of Russian literature, and activism. And each of them ends up face-to-face with a secret police that is highly skilled at fomenting paranoia, division, and self-betrayal. A man and his wife each become collaborators, without the other knowing; an artist is chased into the woods, where he remains in hiding for four years; a researcher is forced to deem a patient insane, damning him to torture in a psychiatric ward. Ludmila Ulitskaya's novel belongs to the tradition of Dostoevsky, Tolstoy, and Pasternak: it is a work consumed with politics, love, and belief—and a revelation of life in dark times.
