A Survival Guide for Law Enforcement BoD – Books on Demand

It is all about the firefight, the skills, the formations and methodology of intense short range simulated combat. This book covers the actions immediately before, during and after that close range clash of fire power. No plan survives contact intact so you should know what to do when you have to make a decision and give the orders or follow the orders given. When the rounds are flying there is no time to discuss possible options and responses. If you do it will be too late. This book covers a wide range of tactics, from US Marine, US Army, British and Soviet infantry doctrine from several different eras, focusing on how these methods can and are used in simulated combat.

The Barrett M82A1 and its derivatives are among the most successful sniping rifles ever manufactured. Now entering its fourth decade of service, the short-recoil, semi-automatic system

is capable of firing a devastating .50-caliber round with lethal accuracy over distances of more than 2km. Unconfirmed reports from Afghanistan in 2012 accredit the Barrett with one of history's longest ever kills at 2,815m. This is the technical history of a rifle initially developed as a sporting firearm, but which evolved into a long-range sniping rifle and a formidable military anti-materiel tool, designed to neutralize everything from enemy vehicles to parked aircraft. Adopted by snipers across the world, the Barrett rifles have seen active service in Operation Desert Storm, Iraq, and Afghanistan and have become an important addition to police, armed services, and Special Forces units alike.
