Mechanical Properties of Living Tissues Walter de Gruyter

The motivation for writing a series of books on biomechanics is to bring this rapidly developing subject to students of bioengineering, physiology, and mechanics. In the last decade biomechanics has become a recognized discipline offered in virtually all universities. Yet there is no adequate textbook for instruction; neither is there a treatise with sufficiently broad coverage. A few books bearing the title of biomechanics are too elementary, others are too specialized. I have long felt a need for a set of books that will inform students of the physiological and medical applications of biomechanics, and at the same time develop their training in mechanics. We cannot assume that all students come to biomechanics already fully trained in fluid and solid mechanics; their knowledge in these subjects has to be developed as the course proceeds. The scheme adopted in the present series is as follows. First, some basic training in mechanics, to a level about equivalent to the first seven chapters of the author's *A First Course in Continuum Mechanics* (Prentice-Hall, Inc. 1977), is assumed. We then present some essential parts of biomechanics from the point of view of bioengineering, physiology, and medical applications. In the meantime, mechanics is developed through a sequence of problems and examples. The main text reads like physiology, while the exercises are planned like a mechanics textbook. The instructor may fill a dual role: teaching an essential branch of life science, and gradually developing the student's knowledge in mechanics.

Informatics and Telematics in Health Macmillan International Higher Education

This report focuses on technical issues associated with informatics—a term covering all aspects of the development and operations of information systems, the supporting computer methodology and technology, and the supporting telecommunications links. The first of six chapters discusses the purpose of the report together with basic assumptions about health care systems as related to informatics and the use of computer-based information processing and transfer in telecommunications; key computer applications in health; and current trends in these rapidly evolving technologies as they apply to health. Subsequent chapters deal with national health informatics policy and strategy; informatics support for health programs and in the provision of health care; informatics for health manpower development; and the choice of informatics technology. It is concluded that informatics will be increasingly used in all organizations and that its use must be managed. Three annexes contain a list of participants in the international consultation on application of informatics; brief descriptions of sample curricula; and an eight-page glossary. (CGD)

Speakout is a comprehensive English course that helps adult learners gain confidence in all skills areas using authentic materials from the BBC. With its wide range of support material, it meets the diverse needs of learners in a variety of teaching situations and helps bridge the gap between the classroom and the real world.

Present and Potential Uses Routledge

At the beginning of Whitebread Protestants, Daniel Sack writes "When I was young, church meant food. Decades later, it's hard to point to particular events, but there are lots of tastes, smells, and memories such as the taste of dry cookies and punch from coffee hour - or that strange orange drink from vacation Bible school." And so he begins this fascinating look at the role food has played in the daily life of the white Protestant community in the United States. He looks at coffee hours, potluck dinners, ladies' afternoon teas, soup kitchens, communion elements, and a variety of other things. A blend of popular culture, religious history and the growing field of food studies, the book will reveal both conflict and vitality in unexpected places in American religious life.

Reconciling Conflicting Uses Springer Nature

This book provides a window into the world of Islam. It covers the whole spectrum of its beliefs, values, social principles, cultural institutions, and contemporary problems. Edited by Khurshid Ahmad, this book brings together leading Muslim scholarship and covers ideology, culture, the concept of worship, social justice, women in Islam, political theory in Islam, and the objectives of the Islamic economic order. It also discusses what Islam gave to humanity, the Western world and its challenges to Islam, and Islam and the crisis of the modern world.

Accuracy and Stability of Numerical Algorithms gives a thorough, up-to-date treatment of the behavior of numerical algorithms in finite precision arithmetic. It combines algorithmic derivations, perturbation theory, and rounding error analysis, all enlivened by historical perspective and informative quotations. This second edition expands and updates the coverage of the first edition (1996) and includes numerous improvements to the original material. Two new chapters treat symmetric indefinite systems and skew-symmetric systems, and nonlinear systems and Newton's method. Twelve new sections include coverage of additional error bounds for Gaussian elimination, rank revealing LU factorizations, weighted and constrained least squares problems, and the fused multiply-add operation found on some modern computer architectures.

A Brief History of Modern India Springer Science & Business Media

The history of modern European languages has been largely determined by the range of functions they have acquired, particularly after 1500. This development necessitated a notable expansion of their syntax and lexis, but is most characteristically reflected in the conventionalization of text types. Starting from the German concept of Textsorte as developed from the 1960s onwards, the present account is a first comprehensive attempt at charting the field for the history and present-day situation of the English language. In text types, a designation is linked with a more or less stable form which guides the writer's production as well as the reader's expectation, permitting one to recognize straightforward uses as well as deliberate misuses. Some two thousand of such designations are here listed with minimal definitions and dates for first occurrences. The discussion then concentrates on selected types, which are seen as especially illustrative for English: book dedications, cooking recipes, advertisements, church hymns, lexical entries, and jokes. Their functions and development over time are treated in correlation with their specific linguistic characteristics and adaptations to different period styles and social changes in the readership. The functional range of text types in traditions outside England and the consequences of the export of English categories are exemplified by the history of Scots/Scottish English and of English in India. The arguments are accompanied by a lavish supply of textual excerpts and more than fifty pages of facsimiles, which are especially relevant for insights derived from typographical features. A full bibliography and indices are provided at the end. The book will prove useful for decisions on the constitution of representative text corpora and stimulate research into a greater number of individual text types as well as contrastive analyses at least among European languages.

The twenty-three articles in this volume are based on papers and posters presented at the Olomouc Linguistics Colloquium (OLINCO) at Palacký University in the Czech Republic in June 7-9, 2018. This conference welcomed papers that combined analyses of language structure with generalizations about language use. The thematic sections are as follows: Part I. Micro-syntax: The Structure and Interpretation of Verb Phrases; Part II. Micro-syntax: Word-Internal Morphosyntax in Nominal Projections; Part III. Macro-syntax: Structure and Interpretation of Discourse Markers and Projections; Part IV: Empirical Approaches to Contrastive Linguistics and Translation Studies. Články v tomto sborníku vycházejí z příspěvků prezentovaných na konferenci Olomouc Linguistics Colloquium (OLINCO), pořádané Univerzitou Palackého v Olomouci ve dnech 7. 6. - 9. 6. 2018. Jako téma byl zvolen "Jazyk jako prostředek a lingvistická struktura", což mělo umožnit prezentaci referátů ze všech současných lingvistických disciplín, pokud se zabývají vědeckým (empirickým, formálním) popisem jazykového systému. Články jsou rozděleny do následujících tematických sekcí: Part I. Micro-syntax: The Structure and Interpretation of Verb Phrases; Part II. Micro-syntax: Word-Internal Morphosyntax in Nominal Projections; Part III. Macro-syntax: Structure and Interpretation of Discourse Markers and Projections; Part IV: Empirical Approaches to Contrastive Linguistics and Translation Studies.

Essential Environmental Science brings together within a single volume the vast range of techniques, methods and basic tools necessary for the study of the environment. Environmental science has a massive area of operation, utilising the tools from a plethora of traditional sciences and social sciences. This practical manual draws on contributions from leading experts in each field, to present both general and specific environmental methods and techniques within a unique interdisciplinary environmental perspective. Essential Environmental Science offers an invaluable reference source for environmental study in both the laboratory and in the field.

This volume examines the assessment of higher order thinking skills from the perspectives of applied cognitive psychology and measurement theory. The volume considers a variety of higher order thinking skills, including problem solving, critical thinking, argumentation, decision making, creativity, metacognition, and self-regulation. Fourteen chapters by experts in learning and measurement comprise four sections which address conceptual approaches to understanding higher order thinking skills, cognitively oriented assessment models, thinking in the content domains, and practical assessment issues. The volume discusses models of thinking skills, as well as applied issues related to the construction, validation, administration and scoring of performancebased, selected-response, and constructed-response assessments. The goal of the volume is to promote a better theoretical understanding of higher order thinking in order to facilitate instruction and assessment of those skills among students in all K-12 content domains, as well as professional licensure and certification settings.

This book integrates research in positive psychology, Islamic psychology, and Muslim wellbeing in one volume, providing a view into the international experiential and spiritual lives of a religious group that represents over 24% of the world's population. It incorporates Western psychological paradigms, such as the theories of Jung, Freud, Maslow, and Seligman with Islamic ways of knowing, while highlighting the struggles and successes of minoritized Muslim groups, including the LGBTQ community, Muslims with autism, Afghan Shiite refugees, and the Uyghur community in China. It fills a unique position at the crossroad of multiple social science disciplines, including the psychology of religion, cultural psychology, and positive psychology. By focusing on the ways in which spirituality,

struggle, and social justice can lead to purpose, hope, and a meaningful life, the book contributes to scholarship within the second wave of positive psychology (PP 2.0) that aims to illustrate a balance between positive and negative aspects of human experience. While geared towards students, researchers, and academic scholars of psychology, culture, and religious studies, particularly Muslim studies, this book is also useful for general audiences who are interested in learning about the diversity of Islam and Muslims through a research-based social science approach.

This book examines the school failure and success of Chicano students from a wide variety of perspectives. It attempts to promote further understanding of what constitutes, maintains, and helps shape school failure among Chicano students, and to present research and policy agendas that may help to realize Chicano school success. Five sections address current realities of the Chicano schooling experience, language and classroom perspectives on Chicano achievement, cultural and familial perspectives on achievement, educational testing and special education issues, and the big picture and Chicano school failure. Chapters are: (1) "The Plight of Chicano Students: An Overview of Schooling Conditions and Outcomes" (Richard R. Valencia); (2) "Segregation, Desegregation, and Integration of Chicano Students: Problems and Prospects" (Ruben Donato, Martha Menchaca, Richard R. Valencia); (3) "Chicano Dropouts: A Review of Research and Policy Issues" (Russell W. Rumberger); (4) "Bilingualism, Second Language Acquisition, and the Education of Chicano Language Minority Students" (Eugene E. Garcia); (5) "Promoting School Success for Chicanos: The View from Inside the Bilingual Classroom" (Barbara J. Merino); (6) "From Failure to Success: The Roles of Culture and Cultural Conflict in the Academic Achievement of Chicano Students" (Henry T. Trueba); (7) "Cognitive Socialization and Competence: The Academic Development of Chicanos" (Luis M. Laosa, Ronald W. Henderson); (8) "The Uses and Abuses of Educational Testing: Chicanos as a Case in Point" (Richard R. Valencia, Sofia Aburto); (9) "An Analysis of Special Education as a Response to the Diminished Academic Achievement of Chicano Students" (Robert Rueda); (10) "Systemic and Institutional Factors in Chicano School Failure" (Arthur Pearl); and (11) "Conclusions: Towards Chicano School Success" (Richard R. Valencia). This book contains references in each chapter, 30 data tables and figures, notes on contributors, and author and subject indexes. (SV)

This book is the second of two volumes which highlight the concept of financial inclusion from the Islamic perspective. An important element of the Sustainable Development Goals (SDGs), financial inclusion has been given significant prominence in reform and development agendas proposed by the United Nations and G-20. The significance of Islamic financial inclusion goes beyond improved access to finance to encompass enhanced access to savings and risk mitigation products, as well as social inclusion that allows individuals and companies to engage more actively in the real economy. It represents one of the important drivers of economic growth. This volume explores the financial risks associated with lending to low-income groups due to high poverty levels and the lack of collateralization mechanisms. The first book on the market to provide empirical evidence of Islamic microfinance, deposit insurance and micro-entrepreneurship through the analysis of models and country case studies, this edited collection will be of value to those researching development finance, financial inclusion and Islamic finance.

"Stella Cottrell's student-centred approach demystifies critical thinking and breaks down a complex subject into manageable chunks. With clear explanations, relevant examples and plenty of exercises throughout, this book helps students to develop their analytical reasoning skills and apply them to a range of tasks including reading, note-making and writing. This text will turn even the most hesitant student into a proficient critical thinker. This is an ideal companion for students of study skills, humanities, social sciences, business and arts programmes, where assessment includes essay and report writing. It is suitable for students of all levels"--Provided by publisher.
