Vol. 22: Early DSLR Cameras II: Revisiting the Nikon D70 & D70S Pearson Education

I have been somewhat reluctant to write about the absolute best digital single-lens reflex camera I have ever used, the Nikon D800E. The reason is that I like to write about older cameras that have become cheaper to buy and use for the frugal photographer. Although some of the cameras I have written about were terribly expensive when first released, by now they are reasonably cheap. For example, I've written books about the Canon EOS 1DS/1DS Mark II, the Nikon D1 and the Nikon D2X. These all are pro DSLRs and as such were released at prices ranging from \$6,000 to \$8,000. By now, however, the most you will pay is around \$400 for any of them. In a few years, the Nikon D800E, too, will be much cheaper and an obvious choice for the frugal photographer. No matter the price, the D800 and D800E are two of the best DSLRs ever made. Either will change you as a photographer in fantastic ways.

The folks at Nikon produced the first practical digital single-lens reflex camera with the Nikon D1 in 1999, but Canon was hot on their heels, reaching out to the Enthusiast photography market first with the Canon EOS 30D. Always in direct competiion with Canon, Nikon pushed to get its first Enthusiast DSLR on the market by 2002, the Nikon D100. It may be old now, but it still is a viable choice for the frugal photographer starting out. In this volume of Shawn M. Tomlinson's *Guide to Photography*, Nikon D100 takes center stage, showing exactly how good this camera is and why it makes a great first DSLR.

It has been a long, strange road, and probably has no end clearly in sight. Many more books are in the works as I write this in early December 2018. For example, I have published nine novels to date, and am writing nine more, with plans for some beyond that. The Shawn M. Tomlinson's *Guide to Photography* series has 29 titles in print, with another five or six nearly complete, and plans for 30 to 40 more. I'm also trying to rework and rearrange those books into omnibus editions by chronology and by theme. I never will get every book done I want to do, but it keeps me busy. I always planned on putting out a catalog of all the Zirlinson Books, but kept getting waylaid for one reason or another until now. This catalog is available as a print book in color. The color print book will be cost prohibitive for many people, so there likely will be a black and white version available, too.

Film cameras - the bodies themselves - have little to do with image quality. Lenses are far more important to image quality than camera bodies. So, as long as your camera has accurate shutter speeds, aperture settings and metering, the brand you pick doesn't really have much of an effect

upon the final image. So, then, it appears the model camera you choose is irrelevant. Well, no. The type of film SLR camera you choose is most important to you as the photographer in features and convenience. Comfort has a lot to do with how good you are as a photographer. What I mean by that is that, you choose a camera that feels comfortable in your hands and becomes an extension of your brain as a photographer. This makes it easier to capture the types of images you want.
