## GRAHAM SANTOS

Temporary Labour Migration in the Global Era Routledge  
 Labour migration has been on the agenda of many countries around the globe at the same time as governments of both sending and receiving countries have been trying to develop regulatory mechanisms. This book opens the debate on the global politics of labour migration by proposing a re-assessment of the interaction between states regarding labour migration. Presenting case-specific scholarship from leading experts from five different continents, each contribution engages with the changing landscape of migration control and teases out emerging control patterns, dynamics and correlations that can be made between them and existing control paradigms. The multidisciplinary and global focus in 'Constructing and Imagining Labour Migration' sheds much needed light on the mechanisms deployed by states in their attempts to control labour migration and on the manner in which these mechanisms impact upon migrants themselves, leaving some caught up in the politics of labour market control.

**Gender, Labor, and Migrant Rights in South Korea** OECD Publishing  
 The Korean labour migration system has expanded since the mid-2000s, primarily in the admission of temporary foreign workers for less skilled jobs. Its temporary labour programme, addressed largely at SMEs in manufacturing and based on bilateral agreements with origin countries, has become the largest such programme in the OECD. Structural changes in the labour force, with a rapidly shrinking and highly educated youth population, keep the underlying demand for this programme strong. Yet skills levels of workers are increasing, and there is interest in increasing Korea's share in global talent mobility, including international students and innovative entrepreneurs. This book addresses the question of how to ensure that international recruitment can help meet urgent needs in the labour market which cannot be met locally, and how the temporary labour migration programme - and other migration streams - can evolve to ensure that Korea meets its policy objectives. This review first examines the characteristics of the Korean labour market and main challenges where labour migration can help address demand. Following a discussion of

various programmes and procedures, the review assesses how labour migration is playing a role in different sectors and how programme governance could be improved. It then explores the channels for high-skilled migrants and how these could be improved in light of international experience.

South Korea's Contemporary Engagement with Asia Rutgers University Press

Recruiting Immigrant Workers: Korea 2019 OECD Publishing  
Across National Boundaries Cambridge University Press  
 This report analyzes labor migration trends in Asia and emphasizes the importance of partnerships to promote effective labor migration management. It addresses temporary migrant worker programs, focusing on the Republic of Korea's Employment Permit System and Malaysia's Electrical and Electronics industry.

Rights Claiming in South Korea Springer Science & Business Media

This edition focuses on the employment situation of immigrants. For the first time, this report presents a "scoreboard" of labour-market integration of immigrants, as well as an analysis of wage differentials between immigrants and the native-born.

Migration: Policies, Practices, Activism Recruiting Immigrant Workers: Korea 2019

The Korean Peninsula lies at the strategic heart of East Asia, between China, Russia, and Japan, and has been influenced in different ways and at different times by all three of them. Across the Pacific lies the United State, which has also had a major influence on the peninsula since the first encounters in the mid-nineteenth century. Faced by such powerful neighbors, the Koreans have had to struggle hard to maintain their political and cultural identity. The result has been to create a fiercely independent people. If they have from time to time been divided, the pressures towards unification have always proved strong. This third edition of Historical Dictionary of the Republic of Korea covers its history through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about the Republic of Korea.

**Immigrant Incorporation in East Asian Democracies** Cambridge University Press

This Handbook focuses on the complexity surrounding the interaction between trade, labour mobility and development,

taking into consideration social, economic and human rights implications, and identifies mechanisms for lawful movements across borders and their practical implementation.

**International Migration Outlook 2012** OECD Publishing  
 If well managed, migration generates benefits for migrants, their countries of origin and the countries they settle in. For migrants, it can help them expand their skill sets and improve their standard of living. For destination countries, it can alleviate demographic pressures and foster cultural diversity. For origin countries, it can bring benefits associated with remittances and knowledge transfers. However, in reality, these benefits are rarely achieved, as migration policy failures frequently lead to suboptimal or even negative outcomes. Realizing the full potential of migration therefore demands we foster a paradigm shift toward the fair management of migration. Fair migration is driven by the desire to achieve a triple-win for migrants, destination countries and origin countries. In addition to outlining the key challenges and opportunities associated with fair migration, this volume examines the good practices of a variety of countries and institutions which highlight aspects of fair migration. The volume concludes with policy recommendations for effective and fair migration policymaking at the national and international levels. As a conceptual and empirical contribution to both national and international debates on managing migration, this volume aims to enrich discussions among policymakers, business leaders, civil society actors and scholars alike.

Labour Conditions in Asian Value Chains Emerald Group Publishing

In recent decades, East Asia has become increasingly interconnected through trade, investment, migration, and popular culture at regional and global levels. At the same time, the region has seen renewed national assertiveness and nationalist impulses. The book interrogates these seemingly contradictory developments as they bear on the transformations of the nation and citizenship in East Asia. Conventionally, studies on East Asia juxtapose these developments, focusing on the much-exercised dichotomy of the national and transnational. In contrast, this book suggests a different orientation. First, it moves beyond the simplistic view that demarcates the transnational as "the West". Second, it does not view the national and transnational as distinct or contradictory spheres of influence and analysis, but rather, focuses on the interactions between the two, with a view on how these interactions work to transform the ideals and practices of the "good nation", "good society", and "good citizen". The

chapters cover a broad range of empirical research--education, science, immigration, multicultural policy, human rights, gender and youth orientations, art and food flows, politics of values and regional identity--which highlight the ways in which the nation is reconfigured, and the relationship between the citizen and (national) collective is redefined, in relation to transnational dynamics and frameworks. Transnational Trajectories in East Asia provides a new perspective on and original analysis of transnational processes, bringing a fresh understanding to developments of the nation and citizenship in the region. It will be of great interest to students and scholars of transnationalization and globalization; comparative citizenship, migration, and multiculturalism; and Asian politics, society, and regionalism.

**OECD Food and Agricultural Reviews Innovation, Agricultural Productivity and Sustainability in Korea** Brookings Institution Press

This insightful book explores smaller towns and cities, places in which the majority of people live, highlighting that these more ordinary places have extraordinary geographies. It focuses on the development of an alternative approach to urban studies and theory that foregrounds smaller cities and towns rather than much larger cities and conurbations.

*Korea 2011* OUP Oxford

This volume investigates how larger structural inequalities in sending and receiving nations, immigrant entry policies, group characteristics, and micro level processes, such as discrimination and access to ethnic networks, shapes labor market outcomes, workplace experiences, and patterns of integration among immigrants and their descendants.

**New Policies for New Residents** Edward Elgar Publishing

In an age of globalization there is frequent migration across national borders, resulting in a reconsideration of the notion, practice and social institution of national citizenship. Addressing this phenomenon, the book focuses on the exchange between, and responses, of Korea and Germany. In particular, the book deals extensively with citizenship in Korea where the concept of citizenship is young, and thus the study of citizenship is relatively scarce. This book may be the first of its kind, bringing together eminent Korean and German scholars to analyse various aspects of citizenship in Korea. It is hoped that it will contribute to scholarship in the fields of citizenship and migration and to an understanding of the flow of people and ideas between Asia and Europe.

*Building Partnerships for Effectively Managing Labor Migration: Lessons from Asian countries* Verlag Bertelsmann Stiftung

*Between Foreign and Family* explores the impact of inconsistent rules of ethnic inclusion and exclusion on the economic and social lives of Korean Americans and Korean Chinese living in Seoul. These actors are part of a growing number of return migrants, members of an ethnic diaspora who migrate "back" to the

ancestral homeland from which their families emigrated. Drawing on ethnographic observations and interview data, Helene K. Lee highlights the "logics of transnationalism" that shape the relationships between these return migrants and their employers, co-workers, friends, family, and the South Korean state. While Koreanness marks these return migrants as outsiders who never truly feel at home in the United States and China, it simultaneously traps them into a liminal space in which they are neither fully family, nor fully foreign in South Korea. Return migration reveals how ethnic identity construction is not an indisputable and universal fact defined by blood and ancestry, but a contested and uneven process informed by the interplay of ethnicity, nationality, citizenship, gender, and history.

**Ordinary Cities, Extraordinary Geographies** OECD Publishing

*Migration: Policies, Practices, Activism* brings together a range of scholarly research papers to examine the place of international migration in the modern world, starting with the overview of migration and development by Alejandro Portes. There are many aspects to migration today which are treated in this collection, including new patterns of migration flows, asylum and the handling of refugees, multiculturalism, religious and cultural diversity, identity formation among immigrant communities, and the impact of migration upon social and economic development. Chapters in this book look at a variety of migration case studies, including aspects of international migration in Europe; movement from sub-Saharan Africa northwards; movement from Albania to Italy; a comparison of the USA and Germany; the entry of international brides to South Korea; and the concept of diversity and its use in the study of the outcomes of migration. This is a stimulating collection which looks at many facets of the phenomenon. This book was originally published as a special issue of *Ethnic and Racial Studies*.

**Return Migration and Identity Construction among Korean Americans and Korean Chinese** OECD Publishing

Against a background of past, limited examples of international cooperation, and ambitious hopes for extensive future efforts, this volume puts two related questions to the empirical test: under which conditions are states prepared to cooperate over international migration, and what form - bilateral, multilateral, formal, informal - will this cooperation take?

*Recruiters and International Labor Migration* Springer

*Korea 2011: Politics, Economy and Society* contains concise overview articles covering domestic developments and the economy in both South and North Korea as well as inter-Korean relations and foreign relations of the two Koreas in 2010. A detailed chronology complements these articles.

**The Flow of Migrants and the Perception of Citizenship in Asia and Europe** OECD Publishing

Some 10 million migrant workers cross national borders each year and, if they pay an average \$1,000 to recruiters, moving workers over borders is a \$10 billion a year business. *Merchants of Labor* examines the businesses that move low-skilled workers over national borders, asking how much they collect from migrant workers and what can be done to reduce worker-paid migration costs. For-profit recruiters are likely to be an enduring feature of international labor migration, which makes developing tools to improve the management of their activities ever more crucial. The UN recognized in the Sustainable Development Goals for 2030 the need to measure what workers pay to get jobs in other countries with the goal of reducing worker-paid costs so that workers and their families can benefit more from international labor migration. Using cost data from over 3,000 workers, *Merchants of Labor* examines the often murky world of labor brokers, travel agents, and others who move low-skilled workers from one country to another in order to explore lower worker-paid migration costs. It explains the three core functions of labor markets— recruitment, remuneration, and retention— and shows how national borders increase recruitment costs. New data on what workers pay to get jobs in other countries are presented, and incentives to complement enforcement are explored as a way to induce recruiters to protect migrant workers.

*Transforming Connections between Peru and South Korea* Walter de Gruyter GmbH & Co KG

Economic globalization, modern transportation, and advanced communication technologies have greatly enhanced the mobility of people across national boundaries. The resulting demographic, social, and cultural changes create new opportunities for development as well as new challenges for lifelong learning. *Transnational Migration and Lifelong Learning* examines the changing nature of lifelong learning in the current age of transnational migration. The book brings together international scholars from a range of countries in a dialogue about the relationship between work, learning, mobility, knowledge, and citizenship in the context of globalization and migration. It covers a wide range of topics, including: global perspectives and analyses of migration; the impact of migration on lifelong learning; processes of exclusion and inclusion in lifelong learning; the tension between mobility, knowledge, and recognition; and transnationalism, learning communities, and citizenship. This book was originally published as a special issue of the *International Journal of Lifelong Education*.
