JOHNSON MOYER

The Way of the World Princeton University Press
 Comparative research on higher education in developing and transitional countries is often focused on such issues as access, finance, student mobility and the impact of globalization, but there has been little attention to curriculum and the forces that shape it. *Confronting Challenges to the Liberal Arts Curriculum* fills an important gap in the literature by examining the context, content, challenges, and successes of implementing liberal arts coursework within undergraduate curriculum. In order to fully understand the place of liberal education in each location, chapter authors have employed a wide lens to investigate the influences upon curricular content in China, India, Mexico, Pakistan, Poland, Russia, South Africa, and Turkey. Thus, this volume explores how curricular content is decided, how educational programs are being structured, and whether countries are viewing higher education as more than just the preparation of students for specialized knowledge. By providing detailed case studies of these countries at crucial transition points in their higher education systems, each chapter outlines the state of higher education system and the government's role, the impact of imported models, the presence of a liberal education, the curricular formation, and best examples of successful programs. Ultimately, this volume depicts how global influences have come to rest in developing countries and how market forces far removed from faculty and students have shaped the undergraduate curriculum. This valuable book is of interest to scholars and researchers in Higher Education as well as practitioners working to foster student and faculty exchange and raise awareness of curricular issues.

Pakistan Studies Textbooks from Pakistan: Pakistan, history, culture and govt Hodder Education
Understanding Pakistan: Emerging Voices from India is the outcome of a national seminar for research scholars on Pakistan organized by the Centre for Pakistan Studies at the MMAJ Academy of International Studies, Jamia Millia Islamia, New Delhi. The aim of the seminar was to explore how young minds in India view Pakistan, the quintessential 'enemy' country or the 'other' of India. The range of topics included issues related to Pakistan's politics, economy, popular culture, education, environment, sectarian divide, minorities, policy towards Jammu & Kashmir and foreign relations. The established academic discourse on Pakistan in India is largely dominated by concerns linked to security threats emanating from within Pakistan. Due to this overemphasis on security-related issues, Indian scholarship on Pakistan is considered to be highly subjective and partisan. However, in this

volume, most of the young scholars distance themselves from the main thrust of Indian scholarship on Pakistan and provide a fresh perspective on Pakistan which can potentially rupture the established tradition of Indian scholarship on Pakistan. Hopefully, it will be these scholars who in the near future will be at the forefront of emerging scholarship on Pakistan in India.

 Memorizing the concepts of History is really difficult for students, who have never been to Pakistan. Students who perceive that history is dull, boring and difficult, can make history as fun learning. This book provides Complete solutions for Pakistan studies. It has been developed by keeping in view the needs and requirements of students. This book is recommended for all Pakistan's boards of intermediates and secondary education. What's included in this book. Solved Past papers Comprehensive Outline for Long Questions Multiple Choice Questions (MCQs) Solved Short Answers

Pakistan in National and Regional Change Routledge
 This book tells the story of the tragic and often tormented relationship between the United States and Pakistan. Pakistan's internal troubles have already threatened U.S. security and international peace, and Pakistan's rapidly growing population, nuclear arsenal, and relationships with China and India will continue to force it upon America's geostrategic map in new and important ways over the coming decades. This book explores the main trends in Pakistani society that will help determine its future; traces the wellsprings of Pakistani anti-American sentiment through the history of U.S.-Pakistan relations from 1947 to 2001; assesses how Washington made and implemented policies regarding Pakistan since the terrorist attacks on the United States on September 11, 2001; and analyzes how regional dynamics, especially the rise of China, will likely shape U.S.-Pakistan relations. It concludes with three options for future U.S. strategy, described as defensive insulation, military-first cooperation, and comprehensive cooperation. The book explains how Washington can prepare for the worst, aim for the best, and avoid past mistakes.

10000+ Objective MCQs with Explanatory Notes for General Studies UPSC/ State PCS/ SSC/ Banking/ Railways/ Defence 2nd Edition Simon and Schuster
 With each passing day, Pakistan becomes an even more crucial player in world affairs. Home of the world's second-largest Muslim population, epicenter of the global jihad, location of perhaps the

planet's most dangerous borderlands, and armed with nuclear weapons, this South Asian nation will go a long way toward determining what the world looks like ten years from now. The Future of Pakistan presents and evaluates several scenarios for how the country will develop, evolve, and act in the near future, as well as the geopolitical implications of each. Led by renowned South Asia expert Stephen P. Cohen, a team of authoritative contributors looks at several pieces of the Pakistan puzzle. The book begins with Cohen's broad yet detailed overview of Pakistan, placing it within the context of current-day geopolitics and international economics. Cohen's piece is then followed by a number of shorter, more tightly focused essays addressing more specific issues of concern. Cohen's fellow contributors hail from America, Europe, India, and Pakistan itself, giving the book a uniquely international and comparative perspective. They address critical factors such as the role and impact of radical groups and militants, developments in specific key regions such as Punjab and the rugged frontier with Afghanistan, and the influence of—and interactions with—India, Pakistan's archrival since birth. The book also breaks down relations with other international powers such as China and the United States. The all-important military and internal security apparatus come under scrutiny, as do rapidly morphing social and gender issues. Political and party developments are examined along with the often amorphous division of power between Islamabad and the nation's regions and local powers. Uncertainty about Pakistan's trajectory persists. The Future of Pakistan helps us understand the current circumstances, the relevant actors and their motivation, the

 This book explores the richness of Pakistan's religious landscape,

giving attention to a number of topics: Shia flagellation processions, Urdu-language pulp fiction, streetside rituals involving animals (pariah-kites and fortune-telling parrots), and the use of sorcery to contend with the jinns that are believed to infest cities such as Lahore. Uniting these topics is an investigation of how Islamist politicians seek to eradicate sectarian diversity and repress localized forms of Muslim folk practices in the name of a standardized, uniform, and globalized version of Islam. The book looks at forms of resistance to this Islamist globalization, such as collaborative efforts by Christian, Hindu, and Muslim human-rights activists to repeal Pakistan's notorious blasphemy law and assert the worth of religious pluralism.

#1 NEW YORK TIMES, WALL STREET JOURNAL, AND BOSTON GLOBE BESTSELLER • One of the most acclaimed books of our time: an unforgettable memoir about a young woman who, kept out of school, leaves her survivalist family and goes on to earn a PhD from Cambridge University “Extraordinary . . . an act of courage and self-invention.”—The New York Times NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW • ONE OF PRESIDENT BARACK OBAMA'S FAVORITE BOOKS OF THE YEAR • BILL GATES'S HOLIDAY READING LIST • FINALIST: National Book Critics Circle's Award In Autobiography and John Leonard Prize For Best First Book • PEN/Jean Stein Book Award • Los Angeles Times Book Prize Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara's older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she'd traveled too far, if there was still a way home. “Beautiful and propulsive . . . Despite the singularity of [Westover's] childhood, the questions her book poses are universal: How much of ourselves should we give to those we love? And how much must we betray them to grow up?”—Vogue NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • O: The Oprah Magazine • Time • NPR • Good Morning America • San Francisco Chronicle • The Guardian • The Economist • Financial Times • Newsday • New York Post • theSkimm • Refinery29 • Bloomberg • Self • Real Simple • Town & Country • Bustle • Paste • Publishers Weekly • Library Journal • LibraryReads • Book Riot • Pamela Paul, KQED • New York Public Library

Rethinking Pakistan Hodder Education

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

Pakistan Studies R P Meena

The education of young people is context bound. This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education. There is not a single context across this broad geographical expanse, rather different religions, different political systems and different values exert influences that create distinctive programmes that characterise different countries. Yet there are also commonalities such as the post-colonial nature of most of the countries portrayed in this book, determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities. There are also voices of resistance in these chapters, recognising the realities of local contexts but also recognising the need for change. Social studies education in these contexts may well be descended from its origins in North America, but in South and South Asian contexts, it has taken on new purposes, new forms and new values. Education researchers, policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them.

Educated Oxford University Press, USA

In Role Compatibility as Socialization, Dorothée Vandamme examines Pakistan's socialization process in terms of role compatibility in the 2008-2018 period. Adopting an Interpretative phenomenological analysis (IPA) method of analysis, Vandamme builds on role theory to develop a theory of socialization as role compatibility to explain the dynamics of Pakistan's (dys)functioning position and its status-seeking process as a fully functioning member of the international system. Specifically, she focuses on how Pakistani civilian and military leaders define their country's positioning towards India, the United States and China. In doing so, she traces the link between domestic role contestation at the country's inception and the resulting domination of the military's conception of their country, state identity, how it projects itself externally and how it is received by others. Departing from strictly structural or agent-oriented explanations, Vandamme expertly demonstrates Pakistan's perceived role compatibility with significant others and underlines the causality between state identity, foreign policy behavior and socialization. Role Compatibility as Socialization will be of interest to graduate students and researchers who work on and with role theory and socialization theory, and for those with a research interest on South Asia.

[The Future of Pakistan](#) Routledge

This text covers the syllabi prescribed by the major public sector universities in Pakistan. The book provides a complete overview of the historical background and political development of Pakistan, the breakup of 1971, and the nuclearization of Pakistan.

The foreign relations section deals with the role of world powers during the wars fought by Pakistan and Pakistan's relations with South Asian and Middle Eastern countries. The economy and culture of Pakistan are also covered in great detail.

[Pakistan Studies](#) Independently Published

Pakistan is one of the most important states in the international system and a key concern of western security. This collection identifies a set of national and regional/international trends which will be critical in determining the medium to long-term stability and cohesion of Pakistan, yet which have received relatively little attention elsewhere. Experts on different aspects of Pakistan explore issues of political Islam, minorities, wider political trends, and the economic impacts of the recent floods to seek to explain some of the key drivers of change within Pakistan, and to reflect on the dynamics of US-Pakistan relationships and Pakistan's rethinking of its regional relationships to understand key regional and international dynamics shaping Pakistan's future. This book will be of interest to scholars in south asian political studies, ethnic studies and international relations. This book was published as a special issue of Contemporary South Asia.

[introduction to Pakistan Studies \(compulsory\)](#) IRR1

The first book to explore the modern history of Islam in South Asia The first modern state to be founded in the name of Islam, Pakistan was the largest Muslim country in the world at the time of its establishment in 1947. Today it is the second-most populous, after Indonesia. Islam in Pakistan is the first comprehensive book to explore Islam's evolution in this region over the past century and a half, from the British colonial era to the present day. Muhammad Qasim Zaman presents a rich historical account of this major Muslim nation, insights into the rise and gradual decline of Islamic modernist thought in the South Asian region, and an understanding of how Islam has fared in the contemporary world. Much attention has been given to Pakistan's role in sustaining the Afghan struggle against the Soviet occupation in the 1980s, in the growth of the Taliban in the 1990s, and in the War on Terror after 9/11. But as Zaman shows, the nation's significance in matters relating to Islam has much deeper roots. Since the late nineteenth century, South Asia has witnessed important initiatives toward rethinking core Islamic texts and traditions in the interest of their compatibility with the imperatives of modern life. Traditionalist scholars and their institutions, too, have had a prominent presence in the region, as have Islamism and Sufism. Pakistan did not merely inherit these and other aspects of Islam. Rather, it has been and remains a site of intense contestation over Islam's public place, meaning, and interpretation. Examining how facets of Islam have been pivotal in Pakistani history, Islam in Pakistan offers sweeping perspectives on what constitutes an Islamic state.
