This collection
brings
together
insights from
research and
scholars'
practical
experience on
the role of
language and
language use

in teacher practices at the university level in EMI contexts, offering global perspectives across diverse educational settings. The volume considers the language-related practices, processes and ways of thinking implemented in EMI contexts as teachers and students co-construct meaning through interaction while also situating these observations within the

wider educational policies of institutions, societal norms and contextual pedagogies. The book highlights both the diversity and commonalities of the challenges and opportunities in enhancing student experience in different EMI contexts, drawing on international perspectives spanning South America, Europe and Asia. In so doing, the volume offers

a comprehensive portrait of the current realities of the EMI experience at the university level, empowering stakeholders to critically reflect upon and adapt their classroom strategies to their own realities and chart new directions for research in the field. The book will be of particular interest to scholars interested in issues in English-medium instruction,

applied linguistics, language policy and language education, as well as those currently teaching in EMI contexts. *S Chand Higher Engineering Mathematics* Oxford University Press, USA Content and Language Integrated Learning (CLIL) has now become a feature of education in Europe from primary school to university level. CLIL programmes are intended to integrate

language and content learning in a process of mutual enrichment. Yet there is little consensus as to how this is to be achieved, or how the outcomes of such programmes should be measured. It is evident that a further type of integration is required: that of bringing the practice of CLIL into closer contact with the theory. In this, it is necessary to establish the role

played by other fundamental aspects of the learning process, including learner and teacher perspectives, learning strategies, task design and general pedagogical approaches. The first part of this book provides a variety of theoretical approaches to the question of what integration means in CLIL, addressing key skills and competences that are taught and learned in

CLIL classrooms, and exploring the role of content and language teachers in achieving an integrated syllabus. The second part takes specific cases and experimental studies conducted at different educational levels and analyses them in the light of theoretical considerations .

Integration of theory and practice in CLIL S.

Chand Publishing
The United States Military Academy at West Point is one of America's oldest and most revered institutions. Founded in 1802, its first and only mission is to prepare young men—and, since 1976, young women—to be leaders of character for service as commissioned officers in the United States Army. West Point's

success in accomplishing that mission has secured its reputation as the foremost leadership-development institution in the world. An Academy promotional poster says it this way: "At West Point, much of the history we teach was made by people we taught." Carved from Granite is the story of how West Point goes about producing military leaders of character. An opening

chapter on the Academy's nineteenth-century history provides context for the topic of each subsequent chapter. As scholar and Academy graduate Lance Betros shows, West Point's early history is interesting and colorful, but its history since then is far more relevant to the issues—and problems—that face the Academy today. Drawing from oral histories, archival sources, and

his own experiences as a cadet and, later, a faculty member, Betros describes and assesses how well West Point has accomplished its mission. And, while West Point is an impressive institution in many ways, Betros does not hesitate to expose problems and challenge long-held assumptions. In a concluding chapter that is both subjective and interpretive, the author

offers his prescriptions for improving the institution, focusing particularly on the areas of governance, admissions, and intercollegiate athletics. Photographs, tables, charts, and other graphics aid the clarity of the discussion and lend visual and historical interest. Carved from Granite: West Point since 1902 is the most authoritative history of the modern United States Military

Academy written to date. There will be lively debate over some of the observations made in this book, but if they are followed, the author asserts that the Academy will emerge stronger and better able to accomplish its vital mission in the new century and beyond.

Any good text book, particularly that in the fast changing fields such as

engineering & technology, is not only expected to cater to the current curricular requirements of various institutions but also should provide a glimpse towards the latest developments in the concerned subject and the relevant disciplines. It should guide the periodic review and updating of the curriculum.

 About the Book: This book Engineering Mathematics-II is designed as a self-contained, comprehensive classroom

text for the second semester B.E. Classes of Visveswaraiah Technological University as per the Revised new Syllabus. The topics included are Differential Calculus, Integral Calculus and Vector Integration, Differential Equations and Laplace Transforms. The book is written in a simple way and is accompanied with explanatory figures. All this make the students enjoy

the subject while they learn. Inclusion of selected exercises and problems make the book educational in nature. It shou.

Engineering Mathematics - Ii

The present edition of this book has been thoroughly revised and a lot of useful material has been added to improve its quality and use. It also contains lot of pictures and colored diagrams for better and quick

understanding as well as grasping the subject matter.

Catalog of Course of Instruction at the United States Naval Academy

The book focuses on change and development as organizational phenomena. The entire text is divided into 5 sections viz., Understanding Organizational Processes and Change, Management of Change, Nature of Organizational Development, OD Interventions

and Strategies, and Contemporary Issues in OD, as the concluding part. With a strong conceptual foundation, the book takes the readers through the entire processes and stages of change as seen and experienced worldwide. The main strength of the book lies in its exhaustive treatment to a wide array of topics along with various exhibits on change

management in Indian and global organizations. The role of leadership, organizational culture and technology as integral parts of any change initiative are dealt with in detail. Later part of the book covers various OD models and tools, change management strategies and contemporary

issues such as diversity management. The language is simple and enhances learning for the reader with various snapshots of different stages/levels of change and OD at organizations worldwide. The book is aimed at MBA students who specialize in HR and Strategy areas.

Industry practitioners and change consultants will also benefit greatly with the title. *Technical Communication*
