Liberalism and Transformation

Notion Press

Liberalism and

Transformation is the first scholarly work that explores the historical, philosophical, and intellectual

development of global liberalism since the nineteenth century in the context of the deployment of violence, force, and intervention. Using an approach that includes interpretive and contextual analysis of

texts from writers, philosophers, and policy-makers across nearly two centuries, as well as historiographical and historical analysis of archival documents (some of which have been recently declassified) and other media, Liberalism and Transformation narrates the messy history of emancipatory liberalism and its engagement with issues of war and peace. The book contributes to both a rethinking of liberal democracy and its relationship to world

politics, as well as the effects of liberal internationalism on global processes. Furthermore, Liberalism and Transformation invites readers to reflect on global ethics and transformation in world politics. In the first place, it shows how ethical imaginings of the world have direct effects on actions of transformative importance. In the second place, it suggests that discourses are fluid, changing, and complex.

Lost Las Vegas traces the cherished places in the city that time and the brutal forces of economics have swept aside before the National Register of Historic Places could save them from the wrecker's ball or, in the case of Las Vegas, before the Neon Boneyard can claim them. Organised chronologically starting with the earliest losses and ending with the latest, the book details the many hotels and casinos that failed to move with the times and got swept away for something bigger, better and brighter. Legendary names in the field of entertainment have come and gone - the Sands hotel featured

many of the rapack in residence, but the casino is long gone. Howard Hughes and the mob featured heavily in Vegas history but neither could sustain their success for very long. Today, it is the showgirl who is under threat. That Vegas institution is under threat from the big setpiece shows such as Cirque du Soleil. Losses include: Arizona Club, El Portal Theater, Clark County Courthouse, Hotel Nevada, First State Bank, Las Vegas Rail depot, El Dorado Club, Old Ice House, Atomic Tourism, Helldorado on Fremont Street, The Green Shack, El Rancho Vegas, Hotel Last Frontier, Desert Inn, Sands, Sahara, The Thunderbird, The Mint, Royal Nevada,

Stardust, Showboat, Hotel Biltmore, Dunes, Hacienda, Moulin Rouge, Tally Ho, Paddlewheel/Debby Reynold's. Silver Slipper, Tam O'Shanter, Bonanza, Boardwalk Casino, Old Las Vegas Convention Center, Landmark Hotel, Aladdin, La Concha, Westward Ho!, Castaways Science, Scientists, and Society Routledge Doctoral Thesis / Dissertation from the year 2017 in the subject Business economics - Business Management, Corporate Governance, grade: NA, University of Glasgow (Adam Smith Business School), language: English, abstract: Within luxury, an area that is becoming increasingly important due to the visibility of

this industry is Corporate Social Responsibility (CSR). While consumers are still not actively demanding CSR in luxury products and services, and there is evidence that CSR is not a key area of interest for the luxury industry; the luxury industry is becoming the target of non-governmental organizations (NGOs) and other stakeholders interested in environmental and ethical practices. Thus, it is essential that luxury companies explore CSR implementation, as neglecting to do so, is likely to affect their brands and their brand value. Due to the increasing relevance of CSR within luxury, this research explores the role of CSR within

luxury and how it, together with other factors, contributes to brand value in luxury. An additional consideration is that despite the importance of brand value in luxury, the industry does not normally measure, manage and leverage brand value. As a result, it is also necessary to examine how brand value is perceived within luxury. To meet these research goals, a mixed methods approach was selected. More specifically, a theoretical framework was built with input from the literature and interviews with key interviewees from the luxury industry. Then, the theoretical framework was tested quantitatively. The quantitative analysis was conducted with a

dataset based on consumer panels, and additional secondary data including Bloomberg, CSRHub, Dow Jones Sustainability Index (DJSI), Interbrand, and company reports. The results were subject to 'credibility checks' with interviewees from the industry. It is noteworthy to highlight that for the statistical analysis, one of the largest datasets with US consumer data was used. Similarly, for the qualitative interviews, representatives from some of the largest luxury companies in the world in terms of brand value, and luxury stakeholders were recruited.

INDIA'S NEW CAPITALISTS JP Medical Ltd

A comprehensive guide to the clinical use of lasers in cardiovascular disease. Describes techniques of laser angioplasty, covering topics that range from early results using bare fiber optics to percutaneous coronary laser thermal angioplasty.

Extensively illustrated with photographs, x-rays, angiograms, drawings and diagrams.

Corporate Social Responsibility and Brand Value in Luxury University of Michigan Press

Climate change is one of the single most important global environmental issues facing the world today and is emerging as a

major topic in tourism studies. Tourism is one of the world's largest industries; it both contributes to, and will be notably affected by, climate change. Given the emerging global legal frameworks to reduce emissions of greenhouse gasses, growing costs of carbon and pro-environmentally orientated customers, carbon management in tourism is a necessity. Tourism must take responsive actions to enable travel and tourism to deliver the peak experiences that tourists seek with a lower carbon footprint. Carbon Management in Tourism is the first book devoted to carbon emission reductions and to showcase a wide range of practical mitigation measures. This book

provides a comprehensive overview by combining theory and practice of climate change mitigation in global tourism, addressing various levels of scale, such as global, national, and regional tourism systems, as well as individual tourism businesses. It integrates a thorough scientific discussion of the causes of emissions growth, along with an analysis of the major options to reduce emissions, and state-of-the-art carbon management practices. Detailed case studies provide examples of tourism businesses or destinations that have successfully reduced emissions of greenhouse gasses, with consideration of economic and socio-

cultural issues integrated throughout. This timely and important volume is essential reading for undergraduate and postgraduate students as well as academic researchers interested in Tourism, Environmental Management, Geography and Carbon Management.

Carbon Management in Tourism Stenlake Publishing

Corneal transplantation is a widely practised surgical procedure. Lamellar techniques are favoured replacing penetrating keratoplasty (PK). Endothelial keratoplasty (EK) has been adapted as an alternative in the treatment of corneal endothelial disorders whereby Descemet's membrane and the

endothelium are replaced. Pre-Descemet's endothelial keratoplasty (PDEK) is the latest surgical technique for corneal transplantation. This book is a step by step guide to PDEK for practising ophthalmologists. Divided into five sections, the text begins with the basics explaining corneal anatomy, pre-operative assessment, general techniques in keratoplasty, and the principles of PDEK. The following chapters discuss surgical techniques, special situations, and complications and results. The text covers numerous clinical scenarios and concludes with a section on miscellaneous topics such as OCT guided

PDEK, eye bank preparation, and cosmetic iris implant complications. The text is further enhanced by surgical photographs and includes an interactive DVD ROM demonstrating PDEK techniques. Key points Step by step guide to Pre-Descemet's endothelial keratoplasty (PDEK) Explains surgical techniques for numerous clinical scenarios Includes miscellaneous topics such as OCT guided PDEK and cosmetic iris implant complications Accompanying DVD ROM demonstrates PDEK techniques

The purpose of this Special Issue is to investigate topics related to sustainability

issues in the new era, especially in Industry 4.0 or other new manufacturing environments. Under Industry 4.0, there have been great changes with respect to production processes, production planning and control, quality assurance, internal control, cost determination, and other management issues. Moreover, it is expected that Industry 4.0 can create positive sustainability impacts along the whole value chain. There are three pillars of sustainability, including environmental sustainability, economic sustainability, and social sustainability. This Special Issue collects 15 sustainability-related papers from various

industries that use various methods or models, such as mathematical programming, activity-based costing (ABC), material flow cost accounting, fuel consumption model, artificial intelligence (AI)-based fusion model, multi-attribute decision model (MADM), and so on. These papers are related to carbon emissions, carbon tax, Industry 4.0, economic sustainability, corporate social responsibility (CSR), etc. The research objects come from China, Taiwan, Thailand, Oman, Cyprus, Germany, Austria, and Portugal. Although the research presented in this Special Issue is not exhaustive, this Special Issue provides

abundant, significant research related to environmental, economic, and social sustainability. Nevertheless, there still are many research topics that require our attention to solve problems of sustainability.

History bends to the will of man when it is exercised with faith and steadfastness. Umar Al Farooq was one such man. He bent history to his will, leaving a legacy that successor generations have looked upon as a model to copy. He was one of the greatest of conquerors, a wise administrator, a just ruler, a monumental builder and a man of piety who loved God with the same intensity that other conquerors

of his calibre have loved gold and wealth. . Umar shaped the historical edifice of Islam and whatever Islam became or did not become in subsequent centuries is due primarily to the work of this historical figure. Indeed, Umar was the architect of Islamic civilization. Humankind has a tryst with destiny, to realize its own sublime nature, in the matrix of human affairs. When free will is abused, it reduces humans to the most wretched of creatures. No man understood this better than Umar and few since the Prophet carried this trust with as much wisdom, humility, determination, sensitivity, persistence and courage. Measured by any yardstick, Umar was one of the greatest

figures in human history. In this fascinating biography, the well known author Moin Qazi delves into the life and work of the great hero of Islamic history.

Functional Textiles and Clothing 2020

John Wiley & Sons
It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular `Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of

the old mercantile castes. In this meticulously researched book ? acclaimed for being the first social history to document and understand India?s new entrepreneurial groups ? Harish Damodaran looks to answer who the new `wealth creators? are, as he traces the transitional entry of India?s middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India?s New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

Company News and

Notes GRIN Verlag
This book provides a sustained engagement with contemporary Indian feature films from outside the mainstream, including Aaranaya Kaandam, I.D., Kaul, Chauthi Koot, Cosmic Sex, and Gaali Beeja, to undercut the dominance of Bollywood focused film studies. Gopalan assembles films from Bangalore, Chennai, Delhi, Kolkata, and Trivandrum, in addition to independent productions in Bombay cinema, as a way of privileging understudied works that deserve critical attention. The book

uses close readings of films and a deep investigation of film style to draw attention to the advent of digital technologies while remaining fully cognizant of 'the digital' as a cryptic formulation for considering the sea change in the global circulation of film and finance. This dual focus on both the techno-material conditions of Indian cinema and the film narrative offers a fulsome picture of changing narratives and shifting genres and styles.

Doing Business with Latin America Frontiers Media SA

Aimed directly at international corporations and entrepreneurs venturing into the potentially lucrative markets of Latin

America, "Doing Business with Latin America" provides comprehensive guidance, as well as practical advice on all aspects of developing business. Covering such issues as the context for international business, guidance on market entry, and the principle areas of opportunity, this second edition also includes a substantially updated country-by-country section.

In the nineteenth century Oban became the transport hub of the Highlands, making it an incredibly easy place to get to for tourists wishing to reach the islands and enjoy the famed scenery of this part of the world. Over a century later, it remains one of most popular Highland destinations. Landmarks such as the McCaig tower and Oban Distillery, plus steam locomotives and the old canopied station, feature alongside a bustling

George Street and esplanade. Steamers in the bay, armies of herring gutters on the quay and a photograph of the Oban Hotel on fire add up to a wide-ranging selection of pictures covering the town. Carding Mill Bay, Soroba and Connel Bridge are also featured.

Exam Success in AEB Psychology

Presents a selective overview of situated cognition theory. Chapters contribute to discourse about repositioning situated cognition theory within the broader supporting disciplines and to resolving the problematics addressed within the book.

A Basic Brief

Designed to inform and inspire the next generation of plant

biotechnologists Plant Biotechnology and Genetics explores contemporary techniques and applications of plant biotechnology, illustrating the tremendous potential this technology has to change our world by improving the food supply. As an introductory text, its focus is on basic science and processes. It guides students from plant biology and genetics to breeding to principles and applications of plant biotechnology. Next, the text examines the critical issues of patents and intellectual property and then tackles the many controversies and consumer concerns over transgenic plants. The final chapter of the book provides an

expert forecast of the future of plant biotechnology. Each chapter has been written by one or more leading practitioners in the field and then carefully edited to ensure thoroughness and consistency. The chapters are organized so that each one progressively builds upon the previous chapters. Questions set forth in each chapter help students deepen their understanding and facilitate classroom discussions. Inspirational autobiographical essays, written by pioneers and eminent scientists in the field today, are interspersed throughout the text. Authors explain how they became involved in the field and offer a personal perspective on their contributions

and the future of the field. The text's accompanying CD-ROM offers full-color figures that can be used in classroom presentations with other teaching aids available online. This text is recommended

for junior- and senior-level courses in plant biotechnology or plant genetics and for courses devoted to special topics at both the undergraduate and graduate levels. It is also an ideal reference for practitioners.
