BALLARD BIANCA

*An Earth Day Book for
Kids* Professor Gusto
Judy Freeman has
developed a
comprehensive handbook
with thoroughly annotated
lists of the 2006's best
children's books, lesson

plans, teacher's guides,
stories, songs, and
Internet resources. The
Winners! Handbook starts
with an extensive booklist
of Judy's 100 best books
of 2006, including many
of the big award winners.
(If you own Judy's Books
Kids Will Sit Still For 3, it
follows the same format.
Indeed, you can consider
the new Winners!
Handbook the first update

to that book.) Each entry
includes a meaty and
thoughtful annotation, a
germ (a series of
practical, do-able, useful,
pithy ideas for reading,
writing, and illustrating
prompts and other
activities across the
curriculum); a useful list
of exemplary related
titles; and subject
designations for each title
to ascertain where the

book might fit thematically into your curricular plan or program. There's also a title, author, and subject index for easy access. You find scores of useful and fun ideas, activities, lessons, and ways you can incorporate literature into every aspect of your day and your life. From story hour to school curriculum tie-ins, the many connections include strategies for comprehension, critical thinking skills, research, and problem-solving; songs, games, crafts,

songs, plenty of great across-the-curriculum poetry, creative drama and Reader's Theater, storytelling, booktalking, and book discussion. Most of the books included are fabulous read-alouds, read-alones, and natural choices for Guided Reading, Literature Circles, or Book Clubs. *21st Century: Mysteries of Deep Space* Marshall Cavendish Tapping the collective wisdom of the young adult cancer community Each year, nearly 70,000 young adults between 18

and 40 are diagnosed in the United States with cancer. While there are many sources of information for patients, the special concerns of this age group are rarely discussed. One remarkable exception is PlanetCancer.org. For nearly a decade, those in this "gap" age have sought out this online community for resources, networks, and support from those who have been there and done that. Planet Cancer is an honest, down-to-earth guide to living in this new

world, from Diagnosis to Post-Treatment. Each chapter is informed by Planet Cancer's voice—authoritative, funny, friendly, no-nonsense. Experts address issues from all sides around bedrock “What It's Really Like” essays: deeply personal, unflinching, and often hilarious pieces written by people who actually experienced on Planet Cancer things like banking sperm, adopting a child, or undergoing brain radiation. The book, enlivened with quotes and

real-life stories from Planet Cancer members, gives the uninitiated a sense of community and removes some of the mystery and fear of the unknown. Planet Cancer is now a LIVESTRONG initiative.

I Am Earth The Floating Press

In answer to an advertisement David and Chuck build a small spaceship and are off on a mysterious adventure Gold in the Sky Paw Prints Lucky child - what a wondrous world you live in! This is the theme of

Little Blue Planet - a book meant to be read aloud to very young children. As you and the child explore the pages of this book, you will encounter the natural wonders of our world: forests, jungles, volcanoes, swamps, coral reefs and many more. Each of these wonders is captured in a two-page spread, with a scenic watercolor on the left and an imaginative view featuring a child on the right. This book is a first travelogue for the tiny set. It is primarily a picture book, but has just

enough text to provide context and encourage the child to imagine what it would be like to visit this place. This book makes for a beautiful and quick read.

Internet Simplified

Perennial Press

Our story is based on Emily's actual pet, Thor. Thor is truly an inspiring dog who captures the hearts of all who meet him. Emily and Thor literally can't go anywhere without people, both young and old, wanting to stop and meet Thor. He is always surprising people

with his gentleness and calm demeanor.

World of Wonders Mitchell Lane

Student Book

Red Planet Libraries Unlimited

Preschoolers will have hours of fun with this activity-packed book. There are puzzles to complete, simple mathematics, find objects, alphabets and more . A great way for kids to learn while having fun.

The content boom on the Internet has been explosive in the past few years with more than a billion people surfing worldwide. Internet Simplified shows beginning level computer users how to get comfortable surfing the web and how to navigate

the flood of information once they find what they're looking for. Users will find helpful information on the most talked about newcomers to the online world such as social networking sites like Facebook and MySpace, blogging, and downloading media content from YouTube and iTunes, as well as an introduction to the old standbys such as email, auction sites, and instruction for safe surfing. Coverage on how to safeguard against viruses and SPAM and

keep computers free from unwanted visitors is approached in a gentle, user-friendly manner so anyone can apply the techniques and be free from troublesome intrusions. Full-color screen shots and numbered, step-by-step instructions guide readers through the intricacies of navigating the web in a friendly, approachable way. The updated design features a more sophisticated look and larger fonts and images to make this a perfect reference for all ages.

A How-To-Do-It Manual for Librarians, Revised Edition
Blurb

Why should you buy this book for your child? Well, it contains carefully picked information and then presents that in a way that attracts a child. The inclusion of cool photos increase the efficiency of this book as a tool for learning. So what are you waiting for? Encourage your child to learn about the cosmos today!

**21st Century:
Mysteries of Deep
Space 6-Pack**

Createspace Independent Publishing Platform
Launched on Oct. 15, 1997, the spacecraft entered orbit around Saturn on June 30, 2004 (PDT). After its four-year prime mission, Cassini's tour was extended twice. Beginning in 2010, Cassini began a seven-year mission extension in which it completed many moon flybys on Saturn and Titan. In April 2017, operators placed Cassini on an impact course that unfolded over five months of daring dives. On Sept. 15, 2017, the spacecraft

made its final approach to the giant planet Saturn. But this encounter was like no other. This time, Cassini dived into the planet's atmosphere, sending science data for as long as its small thrusters could keep the spacecraft's antenna pointed at Earth. To its very end, Cassini was a mission of thrilling exploration.

National Geographic

Astronomy for kids! If you

are looking for home school supplies, this book needs to be on your list. Through bright illustrations, young readers learn about our solar system to the tune of an old familiar song, "Over in the Meadow". In *Going Around the Sun: Some Planetary Fun*, readers also learn of our place in a very big universe and an appreciation for the world we live in. Mother sun and her "family" of planets "spin," "roll," "tilt," "blow" and "whirl" around the Sun to the tune of "Over

in the Meadow." Each of those actions is astronomically correct—for example, Earth is the one that "tilts," and that's what creates the seasons. It is also astronomically up-to-date, with Pluto being a "dwarf planet." Bright illustrations create an exciting mood, and there's plenty of interesting supplementary information in the back along with tips on related ways to integrate science, art, and literature in the classroom. Backmatter Includes: Further

information about the planets! Tips from the author and illustrator.

Spice and Little Sugar

Random House Digital, Inc.

A child's dream takes us on a journey through space. The child looks for a place to land while exploring each planet, but some are too hot, some are too cold, and some are just made of liquid and gas. Only planet Earth is just right. Fun rhyming text introduces children to each planet and basic facts about it. The text is accompanied

by stunning images of a rocket traveling through the solar system, interspersed by close up images of each planet in order. While each planet is amazing in its own way, there is only one we can call home. If parents choose, this can be the start to a conversation about how we can take better care of our planet. Visit lorifettner.wordpress.com/no-place-like-earth/ to see sample pages from the interior.

The Winners!

Handbook Newbridge

Educational Publishing
A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be

on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a

scientist who disappeared while engaged in secret work for the government on the tesseract problem. [A How-To-Be Green Alphabet](#) Holiday House A nonfiction favorite for more than twenty years, *The Planets* has been updated to include some of the latest discoveries in space exploration. From the burning surface of Venus to the freezing darkness of Neptune, Gail Gibbons takes children on a tour of our planetary neighbors—which are very different from each other in size, shape, orbit,

and even weather. Since its original publication in 1993, *The Planets* has been a home and classroom staple for introducing our solar system to the youngest readers. With her signature blend of clear, bright illustrations and accessible text, Gail Gibbons takes readers on a tour of our planetary neighbors, near and far. From the burning surface of Venus to the freezing darkness of Neptune, the bodies in our solar system are named, described, and illustrated in clear,

well-labeled spreads that give a strong sense of shape and scale to our skies. Each entry is full of intriguing details about their composition, behavior, and moons.
