The Japanese Occupation of Malaya
Independently Published
Metal Curtain Walls is a comprehensive guide to the design and construction of modern curtain wall systems. It covers everything from the basics of construction to detailed information on materials, finishes, and installation methods. With contributions from

leading experts in the field, this book is an essential resource for architects, engineers, and builders involved in the design and construction of commercial and industrial buildings. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright

on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Complete Book of Corvette CRC Press

This volume makes two important contributions: First, it provides a framework grounded in theory and best professional practice that middle and high school teachers, their students, and community partners can use to design, implement, and evaluate service-

learning projects that address authentic community needs. Second, it demonstrates ways collaborative service-learning can enhance students' intellectual development, promote their academic achievement, strengthen their citizenship skills, and accelerate the kinds of educational accountability and reform initiatives emphasized in the national educational standards movement, and the 2002 No Child Left Behind Act. *Serve and Learn: Implementing and Evaluating Service-Learning in Middle and High Schools:* *provides what may be the only comprehensive guide to implementing, assessing, and celebrating service-learning in today's middle and high schools; *emphasizes and explicates a collaborative approach to service-

learning in which teachers, students, and community partners team together to advance learning and meet genuine community needs; *demonstrates how service-learning teams use key elements of standards-based education, multiple intelligences theory, and cooperative learning to guide project development, implementation, assessment, and evaluation; *offers optional designs for service-learning projects that are suitable for use by interns and beginning teachers, as well as by experienced and master teachers, and that can be used in a developmental sequence by school and community partners to build from small, individual projects toward school, system, and community wide projects; and *includes end-of-chapter activities that help those who use the book as a

text to practice the model and its strategies, and use results to create their own service-learning projects. The book is organized in three parts that present service-learning along a theoretical to practical continuum. Part I lays the foundations for the method by proposing a collaborative model for service-learning. Part II explicates this model and explains the four sets of processes that teams use to commit to a project, cooperatively determine students' project outcomes and ways to measure them, develop learning activities to help students achieve outcomes, and then evaluate their projects and celebrate growth. Part III provides resources for carrying out the collaborative model. A wide range of educators will find this book useful. Its

distinctive contributions and features are particularly valuable for teacher educators, students, and community partners already committed to service-learning projects; to those who are introducing service-learning into their practice; and to instructional supervisors, school administrators, and community agencies seeking to create a climate for service-learning or to enrich initiatives already underway.

Managing with Dual Strategies

Wentworth Press

Robert M. Grant combines a highly accessible writing style with a concentration on the fundamentals of value creation and an emphasis on practicality in this leading strategy text. In this new edition, he includes an even greater focus on strategy

implementation that reflects the needs of firms to reconcile scale economies with entrepreneurial flexibility, innovation with cost efficiency, and globalization with local responsiveness. This edition also incorporates some of the key strategic issues of today including: post-financial crisis adjustment, the continuing rise of China, India and Brazil, and the increased emphasis on ethics and sustainability. Coverage is also provided on strategy in not-for-profit organizations. Contemporary Strategy Analysis, Text and Cases 8th Edition combines the text with an updated collection of 20 case studies. It is suitable for both MBA and advanced undergraduate students. Additional teaching resources are also available for instructors, including an

instructor's manual, case teaching notes, test bank, teaching slides, case video clips and extra cases. All of these resources can be accessed via the companion website:

Important new insights into how various components and systems evolved
Premised on the idea that one cannot know a science without knowing its history, *History of Wireless* offers a lively new treatment that introduces previously unacknowledged pioneers and developments, setting a new standard for understanding the evolution of this important technology. Starting with the background-magnetism, electricity, light, and Maxwell's Electromagnetic Theory-this book offers

new insights into the initial theory and experimental exploration of wireless. In addition to the well-known contributions of Maxwell, Hertz, and Marconi, it examines work done by Heaviside, Tesla, and passionate amateurs such as the Kentucky melon farmer Nathan Stubblefield and the unsung hero Antonio Meucci. Looking at the story from mathematical, physics, technical, and other perspectives, the clearly written text describes the development of wireless within a vivid scientific milieu. *History of Wireless* also goes into other key areas, including: The work of J. C. Bose and J. A. Fleming German, Japanese, and Soviet contributions to physics and applications of electromagnetic oscillations and waves
Wireless telegraphic and telephonic

development and attempts to achieve transatlantic wireless communications
 Wireless telegraphy in South Africa in the early twentieth century
 Antenna development in Japan: past and present
 Soviet quasi-optics at near-mm and sub-mm wavelengths
 The evolution of electromagnetic waveguides
 The history of phased array antennas
 Augmenting the typical, Marconi-centered approach,
 History of Wireless fills in the conventionally accepted story with attention to more specific, less-known discoveries and individuals, and challenges traditional assumptions about the origins and growth of wireless. This allows for a more comprehensive understanding of how various components and systems evolved. Written in a clear tone with a broad

scientific audience in mind, this exciting and thorough treatment is sure to become a classic in the field.

 Finalist for the Council on Foreign Relations Arthur Ross Book Award
 One of the world's foremost authorities on the subject of suicide terrorism, the esteemed political scientist Robert Pape has created the first comprehensive database of every

suicide terrorist attack in the world from 1980 until today. In *Dying to Win*, Pape provides a groundbreaking demographic profile of modern suicide terrorist attackers—and his findings offer a powerful counterpoint to what we now accept as conventional wisdom on the topic. He also examines the early practitioners of this guerrilla tactic, including the ancient Jewish Zealots, who in A.D. 66 wished to liberate themselves from Roman occupation; the Ismaili Assassins, a Shi'ite Muslim sect in northern Iran in the eleventh and twelfth centuries; World War II's Japanese kamikaze pilots, three thousand of whom crashed into U.S. naval vessels; and the Tamil Tigers in Sri Lanka, a secular, Marxist-Leninist organization responsible for more suicide terrorist attacks than

any other group in history. *Dying to Win* is a startling work of analysis grounded in fact, not politics, that recommends concrete ways for states to fight and prevent terrorist attacks now. Transcending speculation with systematic scholarship, this is one of the most important studies of the terrorist threat to the United States and its allies since 9/11. "Invaluable . . . gives Americans an urgently needed basis for devising a strategy to defeat Osama bin Laden and other Islamist militants." —Michael Scheuer, author of *Imperial Hubris* "Provocative . . . Pape wants to change the way you think about suicide bombings and explain why they are on the rise." —Henry Schuster, CNN.com "Enlightening . . . sheds interesting light on a phenomenon often mistakenly

believed to be restricted to the Middle East.” –The Washington Post Book World
“Brilliant.” –Peter Bergen, author of Holy War, Inc.

The world is at an inflection point. Advancing technologies are creating new opportunities and challenges. Great demographic changes are occurring rapidly, with significant consequences. Governance everywhere is in disarray. A new world is emerging. These are some of the key insights to emerge from a series of interdisciplinary roundtables and global expert contributions hosted

by the Hoover Institution. In these pages, George P. Shultz and James Timbie examine a range of issues shaping our present and future, region by region. Concrete proposals address migration, reversing the decline of K-12 education, updating the social safety net, maintaining economic productivity, protecting our democratic processes, improving national security, and more. Meeting these transformational challenges will require international cooperation, constructive engagement, and strong governance. The United States is well positioned to ride this wave of change—and lead other nations in doing the same.

The evolution of broadband access networks toward bimodal fiber-wireless (FiWi) access networks, described in this book, may be viewed as the endgame of broadband access. After discussing the economic impact of broadband access and current worldwide deployment statistics, all the major legacy wireline and wireless broadband access technologies are reviewed. State-of-the-art GPON and EPON fiber access

networks are described, including their migration to next-generation systems such as OCDMA and OFDMA PONs. The latest developments of wireless access networks are covered, including VHT WLAN, Gigabit WiMAX, LTE and WMN. The advantages of FiWi access networks are demonstrated by applying powerful network coding, heterogeneous optical and wireless protection, hierarchical frame aggregation, hybrid routing and QoS continuity techniques across the optical-wireless interface. The book is an essential reference for anyone working on optical fiber access networks, wireless access networks or converged FiWi systems.

Broken John Wiley & Sons

Will anyone ever know what happened to the Aloha, a sport fishing boat that vanished with all onboard in the Pacific off San Francisco's coast? 'Knowing' is a complex, inexact business. There's real

truth and then there's courtroom truth; a jury's verdict may or may not approach what actually happened. Nor can someone reading about such an event—one that had no witnesses or hard evidence to explain it—be sure where the truth lies. But trials, judges, and juries are what we use in our legal system to find truth. The Widow Wave explores this alternate reality. It is a fascinating true-life mystery and lawyer procedural rolled into one. Jay Jacobs offers no facile answers—and he's not the flawless protagonist typically starring in such dramas. He lets us see how such a big wrongful death case really unfolds, in a true story that reads like a novel. Will the jury find the truth? Will the reader? "An intelligently told true story of honor, integrity and justice. The

Widow Wave reminded me of The Perfect Storm, played out in a taut courtroom thriller. Jay Jacobs masterfully weaves the harrowing tale of the last voyage of the Aloha, and courtroom battle that followed. A great read." — Robert Dugoni, New York Times Bestselling Author of My Sister's Grave "A compelling story of a modern day maritime tragedy that beautifully discusses the vital importance of advances in observational technologies, forecasts and communications in avoiding future loss of life at sea. Jacobs skillfully weaves together the legal, scientific and maritime narratives to enthrall and educate the reader." — Julie Thomas, Scripps Institution of Oceanography, Manager of the Institute of Geo and Planetary Physics "Trial

lawyer Jay Jacobs, in a unique, personally revealing memoir, defends a widow and her deceased husband's honor in an intimate first person account of how the civil trial process unfolds.... The reader will learn about the strategies, shoals, and embroilments of a real life, vigorously contested trial with its many emotional upheavals." — Justice James Marchiano (ret.), formerly Presiding Justice, California Court of Appeals, First Appellate District "Jacobs' vivid prose pulls you into a compelling drama, deftly transporting you from the courtroom to the storm-tossed Pacific and back to the courtroom again. The book reads like a well-wrought detective novel." — Daniel James Brown, New York Times Bestselling Author of The Boys in the Boat

Death at an Early Age Cambridge University Press

Good Strategy/Bad Strategy clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-

oriented strategy for the real world.

Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to—and approach for—overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with “strategy.” In *Good Strategy/Bad Strategy*, he debunks these elements of “bad strategy” and awakens an understanding of the power of a “good strategy.” He introduces nine sources of power—ranging from using leverage to

effectively focusing on growth—that are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007–08 financial crisis. Reflecting an astonishing grasp and integration of

economics, finance, technology, history, and the brilliance and foibles of the human character, *Good Strategy/Bad Strategy* stems from Rumelt’s decades of digging beyond the superficial to address hard questions with honesty and integrity.
