Manual of Intracytoplasmic Sperm Injection in Human Assisted Reproduction Oswal Publishers

"Not everything in medical science has a clear beginning. The first realization of infertility and putative remedies remain shrouded in contextual history, but likely goes back to the dawn of our species, well before there was a written record. Childlessness was, and is still, considered a burden in some communities"--
Textbook of GST and Customs Law Taxmann Publications Private Limited

How do policymakers, businesses and civil society in India approach the challenge of climate change? What do they believe global climate negotiations will achieve and how? And how are Indian political and policy debates internalizing climate change? Relatively little is known globally about internal climate debate in emerging industrializing countries, but what happens in rapidly growing economies like India's will increasingly shape global climate change outcomes. This Handbook brings together prominent voices from India, including policymakers, politicians, business leaders, civil society activists and academics, to build a composite picture of contemporary Indian climate politics and policy. One section lays out the range of positions and substantive issues that shape Indian views on global climate negotiations. Another delves into national politics around climate change. A third looks at how climate change is beginning to be internalized in sectoral policy discussions over energy, urbanization, water, and forests. The volume is introduced by an

essay that lays out the critical issues shaping climate politics in India, and its implications for global politics. The papers show that, within India, climate change is approached primarily as a developmental challenge and is marked by efforts to explore how multiple objectives of development, equity and climate mitigation can simultaneously be met. In addition, Indian perspectives on climate negotiations are in a state of flux. Considerations of equity across countries and a focus on the primary responsibility for action of wealthy countries continue to be central, but there are growing voices of concern on the impacts of climate change on India. How domestic debates over climate governance are resolved in the coming years, and the evolution of India's global negotiation stance are likely to be important inputs toward creating shared understandings across countries in the years ahead, and identify ways forward. This volume on the Indian experience with climate change and development is a valuable contribution to both purposes.

The special feature of the book is that it tries to cover the syllabi at all India level and is written in a simple and lucid style to be understood by a common man. There are many illustrations, examples and explanation which make the book interesting

reading. The book comprises of two parts, namely, Part I - GST and Part II - Customs Law. The latest developments/recent trends in GST and Customs Law have been incorporated at the appropriate places in the book. While a separate section is earmarked for problems and their keys, another part is assigned for Quiz in GST and Customs Law covering 140 questions which would be highly useful to the students appearing for examinations and interviews. Another significant feature of the book is that it has incorporated and highlighted the changes in the Finance Act, 2020, pertaining to GST and Customs Act, 1962. At the end of every chapter adequate questions for Part A and Part B are given. The GST collections, administrative structure and Officers of GST and Customs are included at the appropriate chapters. Further, the past years question papers of some of the Universities are also included in the book. The First edition has discussed clearly in a simple style the provisions and practical aspects of Central GST, State GST and Integrated GST Act. Students pursuing B.Com, BBA, BL, M.Com, MBA, Allied business courses and students wish to appear examination to become GST Practitioner will find the book as a classroom textbook as in the past.

10 Sample Question Papers for CBSE Board Term 1 Class 12 Biology Disha Publications

Using real-world cases, this clinical guide details the psychosocial challenges faced by patients navigating the world of medically assisted reproduction (MAR). It describes in depth the latest perspectives on counseling approaches to the evolving complexities of family creation, whether fertility issues are a presenting problem or occur during the course of therapy or the aftermath of a struggle with infertility. Applying an evidence-based, cross-border approach, international experts not only discuss advanced perspectives on topics such as third party reproduction, pregnancy loss and adoption, but also newer issues of fertility preservation, 'older' patient parenthood, LGBT and singles' family creation. A comprehensive resource, it explores pioneering insights into fertility counseling such as spirituality, developing disclosure language, a counselor's personal fertility issues, and more. This is an essential aid for medical and mental health professionals to develop and refine the skills needed to treat the increasingly diverse and complex needs of MAR patients.
