[Quiz: Solids, Liquids, and Gases - CliffsNotes Study Guides](#)

State of Matter States of matter determined by a balance of forces among the particles. Particle Energies (temperature) causes them to move around and spread apart while the

attractive Forces smaller particles cause them to stick together. How these forces balanced out determines the state of matter.

[Structure of Matter Study Guide - 7TH GRADE SCIENCE](#)

There are three main states of matter: solid, liquid, and gas. Examples of solids include a table, a pencil, and ice. The atoms in a solid are packed tightly together (often in a particular

order and pattern) and slowly vibrate. Atoms in a liquid are packed less tightly together and flow around each other.
