Ron Larson ... If we have two points $A(x_1; y_1)$ and $B(x_2; y_2)$, then we can draw one and only one line

through both points. By the slope of this line we mean the ratio of Δy to Δx . The slope is often

denoted $m = \frac{\Delta y}{\Delta x} = \frac{y_2 - y_1}{x_2 - x_1}$. For example, the line joining the points (1; 2) and (3; 5) has

slope $(5 - 2) / (3 - 1) = 7 / 2$. Single Variable Calculus - Whitman College Ideal for the single-variable,

one-, or two-semester calculus course, Calculus of a Single Variable, 8/e, contains the first 9

chapters of Calculus, 8/e. The text continues to offer instructors and students new and innovative

teaching and learning resources. The Calculus series was the first to use computer-generated

graphics, to include exercises involving the use of computers and graphing calculators, to be

available in an interactive CD-ROM format, to be offered as a complete, online ... Read Download
