 S Z Roland Barthes S/Z, published in 1970, is Roland Barthes' structural analysis of "Sarrasine", the short story by Honoré de Balzac. Barthes methodically moves through the text of the story, denoting where and how different codes of meaning function. Barthes' study made a major impact on literary

criticism and is historically located at the crossroads of structuralism and post-structuralism. S/Z - Wikipedia Roland Barthes began as a structuralist and in S/Z, he began to branch off into post-structuralism. S/Z is a three hundred page dissection of a short story by Balzac called Sarrasine. The plot of Sarrasine is relatively uncomplicated. A sculptor falls in love with a woman who is actually a castrato, a man who has had his penis surgically removed.
