Annual Symposium :

Selected Papers and

Discussions Amer Inst of

Chemical Engineers

These 37 papers address

such topics as new

process development,

maintenance and

troubleshooting, and

revamping and upgrading
older facilities, as well as
case studies of equipment
failure.

Ammonia Plant Safety and

Related Facilities Amer

Inst of Chemical

Engineers

This work contains the proceedings of the Ammonia and Plant Safety and Related Facilities. It presents information on technological advances, maintenance improvements and safety studies.

AIChE Symposium, San Francisco, 1984 Amer Inst of Chemical Engineers
Containing a collection of 29 papers presented at the 2002 AIChE Ammonia Safety Symposium, this volume covers safe manufacture, transportation and storage of ammonia and

other chemicals, as well as actual case histories and industry needs.

Containing a collection of 29 papers presented at the 2002 AIChE Ammonia Safety Symposium, this volume covers safe manufacture,

transportation and storage of ammonia and other chemicals, as well as actual case histories and industry needs.

Amer Inst of Chemical Engineers
This edition of an annual reference includes 30 papers on such topics as: advanced process control systems to improve ammonia plant safety; fluegas circulation and heat distribution in large scale down-fired reformer furnaces; a description of a process to zero industries; earthquake experience in running a

fertilizer plant; predictive reliability analysis; improvement to shift reactor operations based on computational fluid dynamics; modelling, inspecting, and repairing urea and ammonia high pressure equipment at site; inspection, remediation, and modification of two large-scale KAAP ammonia converters.
