Three speakers at the Second Workshop on Network Management and Control nostalgically remembered the INTEROP Conference at which SNMP was able to interface even to CD players and toasters. We agreed this was indeed a major step forward in standards, but wondered if anyone noticed whether the toast was burned, let alone, would want to eat it. The assurance of the correct operation of practical systems under difficult environments emerged as the dominant theme of the workshop with growth, interoperability, performance, and scalability as the primary sub-themes. Perhaps this thrust is un-surprising, since about half the 100 or so attendees were from industry, with a strong contingency of users. Indeed the technical program co-chairs, Shivendra Panwar of Polytechnic and Walter Johnston of

NYNEX, took as their assignment the coverage of real problems and opportunities in industry. Nevertheless we take it as a real indication of progress in the field that the community is beginning to take for granted the availability of standards and even the ability to detect physical, link, and network-level faults and is now expecting diagnostics at higher levels as well as system-wide solutions.

Sixteen year old Jules Blaze, heir of a Keeper, suspects his family hides a forgotten secret. It's bad enough that his people, the Elfies of Reign, triggered a curse which reduced the entire inhabitants to a mere inch centuries ago. All because of one Keeper who failed his purpose. Even the King's Books, penned with the Majesty's own blood, did not help ward off this anathema. Now, Gehzurolle, the evil lord, and his armies of Scorpents, seem bent on destroying Jules and his family. Why? Gehzurolle's agents hunt for Jules as he journeys into enemy land to find the truth. Truth that could save him and his family, and possibly even reverse the age-long curse. Provided Jules doesn't get himself killed first.

In the first of a dazzling new series, USA Today bestselling author Laura Lee Guhrke introduces London's most renowned matchmaker—and a scoundrel intent on seducing his way to the altar. She's the matchmaker . . . Lady Belinda Featherstone's job is to guide American heiresses to matrimony, and away from men like Nicholas, Marquess of Trubridge. But the charming, disreputable marquess needs a wealthy bride, and he hires Belinda to help him find one. Her task seems easy: find that scoundrel the sort of wife he so richly deserves. But Nicholas's hot, searing kiss soon proves her task will be anything but easy. He's the perfect match . . . Nicholas plans to wed a rich, pretty young darling to restore his fortune, and he's happy to pay a marriage broker to help him. But one taste of Belinda's lips and Nicholas's sensible scheme to marry for money goes awry, and he yearns to show his beautiful matchmaker he's the perfect match . . . for her.

What is the problem with cosmology? As a science cosmology is limited to the study of the universe as a whole, drawing

conclusions based on astronomical observation and mathematical models. Over time cosmology has evolved from a speculative enterprise into a data-driven science; however, even in this new cosmology of facts and figures the origins of our universe remain a mystery, one that will perhaps never be solved. Every day new theories on the birth and evolution of the universe are made without the support of scientific observation-theories that may never be proven by hard evidence. And so cosmology remains a principle driven enterprise, with its roots deeply planted in the soil of uncertainty and wonder, in many ways completely contradictory to the definition of science as we know it today. Bruce Kriger takes readers on a breathtaking journey from the hallowed halls of Harvard to the Isle of Freedom and into the roots of the philosophy of cosmology, deploying an understanding of physics and philosophy to mount a serious challenge to the dominant cosmologist view, expose the politics behind conventional scientific theories (proving that in many cases it isn't the science but the funding behind it that dictates which direction scientific discovery and cosmology itself will take) and define the ultimate limits of human knowledge to form a sober view of what we can know and what will always remain a mystery. Bruce Kriger is a prolific scientific writer whose work has been published in a number of languages. He is a member of several associations including: the Canadian Science Writers' Association, the Canadian Philosophical Association, the International Academy of Science, the World Future Society, the National Space Society and the Royal Astronomical Society of Canada and Planetary Society. In 1996 he has formed his own organization called the Kriger Research Group. Through this organization Kriger has been instrumental in bringing together other research organizations and training institutions for different scientific projects.

The religions of the world preserve the knowledge and protect the secrets of ancient powerful mantras. At the heart of world religion, and among the most powerful mantras in the history of religion, is the Navkar mantra, or Trimantra. In the book "Trimantra", Gnani Purush (embodiment of Self knowledge) Dada Bhagwan explains the Trimantra, its mantra meaning, and the extraordinary benefits of its recitation. Whether wishing to live with no worry while facing problems in everyday life, wondering how to get inner peace, or on a spiritual quest seeking spiritual enlightenment (self realization), utilizing Trimantra provides that - and more. Among the many spiritual books available today, Dadashri's spiritual guidance about the value of Trimantra, and how to best access its spiritual power, is invaluable.

Poetry. "Matthew Lippman's poems know how to love as only a heart knows how to love. Swelling with rage, candor, humor, and empathy, his lyrics embrace vulnerability and grit that navigate the mire that the world lays before us each day. Their music makes singular reconciliations where anxiety and angst are lent a tough and tender grace."—Michael Morse "Reading a Matthew Lippman poem is like encountering an unstoppable force—or forces. One moment you're walking down Broadway next to an old friend who's talking a mile a minute—he's on a tear, he's manic but eminently likable, and his monologue is heating up to the point of combustion. Another moment you're listening to a

voiceover spoken by a hardboiled and vaguely hypnagogic private eye. And yet another moment you're at the Tamarack Lodge in a Catskills of long ago listening to a crazed Borscht Belt comedian. And finally you're listening to a mystic intoning prophecies from deep in the reaches of a dream. I love poetry that takes me

through such a range of voices, guises, poses, intensities, and diapasons, yet also manages to make me feel that I am in the presence of a truly human and truly real and singular personality. These poems were written by a man who takes much pleasure in moving through this mysterious world in language and in a body. He wants to share this pleasure with us—and that is generous,

and as good a reason for writing poems as any I can think of."—Geoffrey Nutter "Matthew's poems wake us up with brutal honesty and humor. If you think poetry has lost touch with everyday life, this book will restore your faith and welcome you back."—Rob MacDonald
